

To whom it may concern

We, Andrew Wireless Systems in Buchdorf declare that the

ION-M7P/80-85HP/9

is a Multiband Remote Unit called Repeater and in FCC ruling a Booster.

For US regulations to FCC we declare that the 900MHz part is switched off electronically and so only the 700MHz, 800MHz, and 850MHz bands are active. Activating the 900MHz band would violate existing FCC regulations and is not permitted.

Andreas Biehler
