RE: Frequency extension in AWS Band for AWS ION Repeaters which have already a valid FCC (old) Grant

To whom it may concern.

We, Andrew Wireless Systems GmbH in Buchdorf, part of CommScope declare for the following system:

ION-U EU H 7P/80-85P/17EP/19P

(new) FCC ID: **XS5-UEUH7817E19P**

- There was only one HW change affecting the AWS band: Extension of Frequency from **2110 to 2180MHz** (old frequency 2110 to 2155MHz)
- Therefore we apply acc. the FCC rules for a new Grant for this changed product
- On all other bands in this system neither HW nor SW was changed, so there is no change in RF behavior
- Therefore we are using the old reports of the old Grant to demonstrate compliance:
 - Report Nr. ECL-EMC-TR-15-028-V01.00_Andrew_ION-U EU H 7P-80-85P-17P-19P EU_700MHz_FCC
 - Report Nr. ECL-EMC-TR-15-029-V01.00_Andrew_ION-U EU H 7P-80-85P-17P-19P EU_862-869MHz_FCC
 - Report Nr. ECL-EMC-TR-15-030-V01.00_Andrew_ION-U EU H 7P-80-85P-17P-19P EU_869-894MHz_FCC
 - Report Nr. ECL-EMC-TR-15-032-V01.00_Andrew_ION-U EU H 7P-80-85P-17P-19P EU_1900MHz_FCC

(old) FCC ID: **XS5- UEUH781719P**

- **A new report has been submitted for the new band 2110-2180MHz including results of simultaneous transmission with the other bands.**

Mit freundlichen Grüßen

Andrew Wireless Systems GmbH

**Andrew
Wireless Systems GmbH**
