IC: 8670A-APBT320
Models: APBT320, APQT320

Product difference explanation

APBT320 and APQT320 are products that have exactly the same usage. The only thing that is different is the keyboard user interface. The APBT320 has a 9 key Perkins keyboard and a scroll wheel. The APQT320 has a QWERTY keyboard.

Apart from the keyboards, the rest of the product is exactly the same. The keyboard is attached to the baseboard by a 16 contact and an 8 contact ribbon connectors. A third 16 connector ribbon cable is used to attach the scroll wheel on the APQT320. Each button is a switch that is read by the baseboard. The wheel is seen like a pair of switches.
