

NOTE :

1. Each board will have a unique serial number.
2. The proposed format for the Serial Number YMDDXXXX, where:
  - Y=year (in hex, starting at 0 for 2009)
  - M=month (in hex)
  - DD=day (in hex)
  - XXXX = Sequential HW serial numbers (hex)
3. This will make the entire Serial Number 32 bits which can be stored in 1 register of the Arm7 flash.
4. The serial number will be printed in bar code and human readable format and the label will be placed on the eASIC chip.
5. The format for the MAC (Node) ID is XXXXXXXX where:
  - (1) XXXXXXXX is a 32-bit linear number in Hex
  - (2) Please reserve 1 to 0xFFFF for internal On-Ramp use , start from 00010000
6. BARCODE TYPE: Code128
7. Follow the Approval Data Sheet for the inspection of each part.
