Installation Guide

1. Battery

1. When the battery is low, the red LED light will flash slowly. (Please refer to Section 5 below for LED indicator).
2. Please remove batteries, if you do not intend to use the product for a long period of time.

Fig 1: The compartment of Alkaline batteries

Fig 2: Dongle Compartment

2. Installation

- 1) Connect Air Dongle to the computer. (Make sure the blue LED on Air Dongle is blinking before turning on the Air Keyboard Power).
- 2) To avoid interference, if you are using more than one wireless dongle at a time, the distance between each dongle should be more than 50cm.
- 3) After idling for 1 minute, Air Keyboard will switch off to save power. Press the power button to turn it on again.
- 4) After connecting the Air Dongle to the USB port of the computer, the system will automatically search for Air Keyboard and establish connection.

3. User definable buttons (Applies to Windows OS)

Get quick access to the media, programs, and files you use most often with definable buttons.

- 1) Please insert the Driver CD and follow steps on screen to install.
- 2) Please select the device name from the pull down menu.

Block 1:

Buttons: Select the button you want to define once at a time.

Block 2:

The quick access buttons could be customized with 3 different methods.

- 1) Application: Click the Browse button to search the file or software you want to access with definable button.
- 2) Pull down menu: Select the program or command from the pull down menu.
- 3) Key: Specify the combinations of keys to be executed with a definable button.

Block 3:

- 3) Red LED: Low battery

6. Using Air Keyboard Conqueror for Play Station 3

Activated with dongle plugged on PS3.

*The L3 and R3 buttons function when the sticks are pressed.

Troubleshooting:

If Air Keyboard does not work properly, please follow these troubleshooting methods.

- 1) Make sure the batteries are properly installed and the batteries contain enough power. When the remaining power is insufficient, the power status indicator will be blinking in RED. Please replace batteries or Air Keyboard will shut down automatically.
- 2) If Air Keyboard does not work properly even with sufficient power, make sure Air Keyboard is turned on and try these steps:
 - a) Remove Air Dongle. Then, reconnect Air Dongle and try again.
 - b) Try a different port or environment:
Try to connect the Air Dongle to a different USB port. Then, check the operation of Air Keyboard. By trying Air Dongle in a different port, you can eliminate any issues caused by the port.
 - c) Test the device on a different computer
If the issue continues to occur, test the keyboard on a different computer in a different environment.

- 3) The pairing between Air Dongle and Air Keyboard was completed before shipment

If above steps do not solve your issue, it might be that the pairing was lost. Perform the following steps to pair again:

- 1) Connect Air Dongle to the computer.
- 2) Bring Air Keyboard next to Air Dongle within 5cm. Press the "Windows"  and "6" buttons at the same time for 5 seconds. Air Keyboard will search for Air Dongle and the Air Dongle LED indicator will be blinking.

When the pairing is completed, Dongle LED will no longer blink and you can start using Air Keyboard.

If Air Keyboard does not work correctly after the above steps are performed 3 times, please consult your dealer.

Warranty Information:

Air Keyboard comes with 2 year limited warranty. Please contact your dealer for details in case of warranty claims. The warranty will void in the case that the defect has been caused by misuse, neglect, improper installation, repair, alteration or accident. Cideko bears no responsibility for failure or defect caused by any third party product or components whether authorized or not.
