

## Operational Description

This device is a Megapixel Wireless Fixed Box Network Camera, which operates in the 2.4GHz frequency spectrum with throughput of up to 150Mbps which OFDM technique will be applied. If the signal to noise ratio is too poor which could not support 150Mbps, the 11Mbps data rate with DSSS technique will be applied.

The transmitter of the EUT is powered by adapter or POE. The antennas used in this EUT are dipole antenna with R-SMA connector.

The other instruction, please have a look at the users manual.
