Subject: ELTA radar FCC ID XWR2107

This agreement is to confirm that the Elta 2107 Radar is not a consumer device, it is not to be deployed in a consumer application, and it is inaccessible to the general public.

Not a consumer device

The Elta 2107 radar is an ITAR-controlled device, and is by definition not a consumer device. The device will be deployed by 4D only in Governmental, Public Service, and Defense applications and sites.

Not user accessible

The Elta 2107 radars are mounted on poles or high building infrastructure inside fenced, secured areas of governmental installations. They are not accessible by the general public, and only accessible with concurrence of site engineering and security authorities. In addition, 4D acknowledges the units are closed and sealed, and not maintained by 4D. Units will be returned to Elta for any maintenance activity.
