Proprietary Statement/Use

This document contains proprietary information of Zebra which may not be used, reproduced, or disclosed to any other parties for any other purpose without the express, written permission of Zebra. This document has been made available as part of the license that has been granted to an authorized user of Zebra software. It is intended solely for the information and use of parties operating and maintaining the equipment described herein. Use of this documentation is subject to the terms and limitations of that license agreement. This document describes all functionality that can be licensed for this product. Not all functionality described in this document may be available to you depending on your license agreement. If you are not aware of the relevant terms of your license agreement, contact sales at Zebra.

Product Improvements

Continuous improvement of products is a policy of Zebra. All specifications and designs are subject to change without notice.

Liability Disclaimer

Zebra takes steps to ensure that its published documentation is correct; however, errors do occur. Zebra reserves the right to correct any such errors and disclaims liability resulting therefrom.

Limitation of Liability

In no event shall Zebra, any of its licensors or anyone else involved in the creation, production, or delivery of the accompanying product (including hardware and software) be liable for any of the following (collectively referred to as "Injuries"): injuries (including death) or damages to persons or to property, or damages of any other kind, direct, indirect, special, exemplary, incidental or consequential, including, but not limited to, loss of use, lost profits, lost revenues, loss of data, business interruption, replacement costs, debt service or rental payments, or damages owing by you to others, whether arising out of contract, tort, strict liability or otherwise, arising from or relating to the design, use (or inability to use) or operation of these materials, the software, documentation, hardware, or from any services provided by Zebra (whether or not Zebra or its licensors knew or should have known of the possibility of any such Injuries) even if a remedy set forth herein is found to have failed of its essential purpose. Some jurisdictions do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

1 Introduction

DartTags are a wireless ultra-wideband (UWB) device from Zebra Technologies that are used for real-time tracking and identification of assets and personnel. DartTags transmit UWB pulses which are detected by a series of Dart UWB receivers. Dart receivers report detected tag events to the Dart RTLS location processing hub where tag location information is computed and reported.

The DartTag tag family consists of the UWT-1100/1101, UWT-1200 tag, and UWT-1300 tags. DartTags provide extended range and precision that is unmatched by conventional RFID solutions. These UWB tags uniquely provide reliability and accuracy in difficult electromagnetic and multipath environments, along with superb battery life for use in demanding industrial requirements.

2 Installation and Operation

DartTags are shipped with the transmitter off. With a proper Dart RTLS system in place, the installation of DartTags is complete when the tag is activated. Tag transmitters are turned on (activated) using a ZLS configuration tool. DartTags transmitting continuously at one blink per second are expected to last multiple years. Batteries are non-replaceable.

3 Orientation

UWT-1100 \ UWT-1101

The UWT-1100 and UWT-1101 DartTag (asset tag) is designed to provide optimal performance when used when either the top or bottom side of the tag is pointing upwards. The picture below shows the top or back side of the tag and the proper orientation.

UWT-1200

The UWT-1200 DartTag Badge (badge tag) is designed to provide optimal performance when used in a specific orientation during use. The picture below shows the front and back side of the tag and the proper orientation.

UWT-1300

The UWT-1200 DartTag is designed to provide optimal performance when either the top side of the tag is pointing upwards. The picture below shows the top or back side of the tag and the proper orientation.

4 Adjustment

No adjustment is necessary once a DartTag is activated. The user may choose to program the tag transmit rate with a Zebra configuration tool.

5 Regulatory Information

US Regulatory Information

FCC ID: XWX-UWT1100, XWX-UWT1101, XWX-UWT1200, XWX-UWT1300

This device complies with FCC Part 15.250 (c).

Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference*
- (2) This device must accept any interference which may cause undesired operation*

Additionally,

- (1) Operation on board an aircraft or satellite is prohibited.*
- (2) Devices operating under this section may not be employed for the operation of toys.*
- (3) Except for operation onboard a ship or terrestrial transportation vehicle, the use of a fixed outdoor infrastructure is prohibited. A fixed infrastructure includes antennas mounted on outdoor structures, e.g., antennas mounted on the outside of a building or on a telephone pole.*

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.*
- Increase the separation between the equipment and receiver.*
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.*
- Consult the dealer or an experienced radio/TV technician for help.*

Canada Regulatory Information

IC ID: 8701A-UWT1100, 8701A-UWT1101, 8701A-UWT1200, 8701A-UWT1300

This device complies with ICES-003, RS-220, and RSS-GEN for indoor use only.

Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference*
- (2) This device must accept any interference which may cause undesired operation*

Cet appareil est conforme à la norme NMB-003, RS-220 et RSS-GEN pour une utilisation en intérieur

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes :

- (1) l'appareil ne doit pas produire de brouillage, et*
- (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.*

EU Regulatory Information

The UWB transmitter equipment conforming to ETSI EN 302 500-1 shall not be:

- installed at a fixed outdoor location;
- installed or used in flying models, aircraft and other forms of aviation;
- installed or used in a road or rail vehicle.

The UWT-1100, UWT-1101, UWT-1200 and UWT-1300 DartTags are Class I transmitters approved for use in the following countries.
