Subject: Class II Permissive change for XX6SRG3900UW
Addition of FCC Rule Part 22.

The Applicant hereby requests to add FCC rule Part 22 to the existing grant for this equipment.

The equipment is electrically identical to that previously tested and certified.

In order to be compliant with Part 22 the software has been changed to support a new filter structure thus ensuring the product meets the 20 kHz occupied bandwidth requirements. Test reports have been submitted with this application to support this occupied bandwidth requirement. All other aspects of the radios performance are as per the data already supplied as part of the Part 90 submission.

Programming of the product can only be performed by an authorised service organization and the manufacturer.

We recognize that it is illegal to operate this equipment in a manner which contravenes the FCC rules and that it is a violation of the FCC rules to operate this equipment on unauthorized frequencies.

Sincerely, 

Company Officer: Mr Steve Wood
