5 The modular transmitter must be The modular transmitter tested in a stand-alone configuration, is tested in a stand-alone i.e., the module must not be inside configuration, another device during testing for Please refer to setup compliance with photo. part requirements. Unless the transmitter module will be battery powered, it must comply with the AC line conducted requirements found in §15.207. AC or DC power lines and data input/output lines connected to module must not contain the ferrites, unless they will be marketed with the module (see §15.27(a)). The length of these lines shall be the length typical of actual use or, if that length is unknown, at least 10 centimeters to insure that there is no coupling between the case of the module and supporting equipment. Any accessories, peripherals, support equipment connected to the module during testing shall be unmodified and commercially available (see §15.31(i)). If using a permanently affixed label, Refer to the lable. Υ 6 the modular transmitter must be FCC labeled with its own identification number, and, if the FCC identification number is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmitter Module FCC XXMFRDMKW41Z" or "Contains FCC ID: XXMFRDMKW41Z." Any similar wording that expresses the same meaning may be used. The Grantee may either provide such a label, an

example of which must be included in the application for equipment authorization, or, must provide adequate instructions along with the module which explain requirement. In the latter case, a copy of these instructions must be included in the application for equipment authorization. 7 The modular transmitter must | Refer to manual comply with any specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must provide adequate instructions

equipment

must | Refer to manual
