## 2. Getting Started Guide

**Statement:** The company has committed to quality, while software update. If the final version of products has any differences from the description of the user guide, please subject to the final product. Thank you!

### 2.1 Battery Charging

MID has an internal charging battery. We suggest to charge up the battery when the battery power is low.

#### Power Adapter

One end of the power adapter connecting the socket, and the other end of the power adapter connecting the socket of the device, then the device can be charged.

#### Way to Charging Battery

1. Plug in the power adapter, the battery charge indicator turns red, indicating charging. Plug when the battery is fully charged, the indicator shows green. After unplug the power adapter, the indicator always shows green.
2. During Battery Charging, user can operate MID.

#### Note:

The charging time will be longer when operating and charging at same time.

### 2.2 How to use Memory Card

#### Insert memory card:

Insert memory card to the Card slot. Use finger to put the card into the slot until “click” sound heard.

Upper left corner of the screen will prompt: SD cards are ready.

#### Browsing files in memory card:

Run "File Browser" program, showing all the files under the root directory. Select "SD card" open to browse the contents of Cary.

#### Remove memory card:

Close all applications or documents which have been opened from the card.

Press the card lightly. It will be ejected partly. Pull the card out. Upper left corner of the screen will prompt "has been removed SD card".

#### Note:

1. Insert card to the right position. Otherwise it will damage the card.
2. Once the card has been locked, it can not be formatted or written.
3. Don't insert and remove the card repeatedly in a short time. It may cause the card damaged.
4. Suggest using major brands of memory card to avoid any incompatibility.

### 2.3 Remove and insert memory card and U disk

**Please don't remove the memory card and U disk while you are using the files of it.** For example, when you are viewing files in my photo, my video or my music, you remove the memory card or U disk directly may cause the memory card and U disk damaged and the device may exit automatically for protection. Remove memory card please refer to "2.2 How to use Memory Card"; remove U disk please close all applications or documents which have been opened from the U disk.

### 2.4 Storage Space

The device has three storage spaces: internal device storage, U disk and memory card. The internal device storage named "LocalDisk"; the memory card named "sdcard"; and the external U disk named "udisk". The user can use space in the localdisk is probably 1GB. The U disk and memory card is on its specific capacity, the maximum support to 32GB memory card.

### 2.5 Power On and Off

- 1、 Power On: When power adaptor is plugged, User can press Power button to enter the Window Platform.
- 2、 Power Off: User can long press (2 seconds) power button, then system will pop up equipment selection dialog box. Select shutdown, System will then pop off the confirmation dialog box, select OK you can shut down. User can long press (8 seconds) power button to shut down the machine.
- 3、 Hibernate: User can long press (2 seconds) power button, then system will pop up equipment selection dialog box. Select dormancy, the system will into hibernation. Then press the power button to boot.
- 4、 Airplane mode: User can long press (2 seconds) power button, then system will pop up equipment selection dialog box. Select airplane mode, the system will into airplane mode.

### 2.6 Vibrate

#### Open vibrate:

Click volume icon on the status bar to adjust the volume to zero to put it on vibrate mode.

#### Close vibrate:

Make the volume is not zero, and then the vibrate mode closed.

### 2.7 Interface switching

System interface can switch the screen automatically according to the direction of the device. Screen time on a two second, the conversion process will become dimmer, the screen switch to normal after finishing.

### 2.8 External Network Cable and U Disk

#### Transfer Box:

If you want to connect Ethernet or USB, you need to connect a transfer box first.

Transfer Box

Make the interface of the adapter connect to the USB interface of the device. There are two USB interface and an Ethernet interface on the adapter. You can connect external network cable and U disk.

#### External network cable:

Ethernet interface

Insert the network cable into the Ethernet interface like the left picture after the adapter is connected to the device. You can get the IP address automatically and also can select to set the IP address by hand.

#### External U disk:

USB interface—connect the U disk

Insert the U disk into the USB interface like the left picture after the adapter is connected to the device. You can copy files among SD card, U disk and internal device storage after the U disk is connected to the device. Copy method you can refer to “7.3 File Browser”.

## 2.9 Connecting to the Internet

### Connecting to the internet by Ethernet:

Make the transfer box connected to the USB switch interface of the devices, and then plug the network cable into the Ethernet port of the transfer box, in the upper right corner of the screen appears "ETH".MID automatically obtain IP address via DHCP to connect the network. If you want to set IP, please go to the Ethernet, and refer to “8.Tips and Tricks”.

### Connecting to the internet by Wi-Fi:

1. Click MENU key to pop-up the menu, and then select "Settings";
2. Select "Wireless Control" in the settings menu;
3. Select the box behind the open Wi-Fi;
4. Open Wi-Fi Settings;
5. All the AP in the vicinity will be listed, click to select the name you want to connect to AP;
6. If the AP before the connection is successful, the AP information will be saved in the pop-up window, select "Connect" starts to connect, choose "forget" to remove AP information;
7. If the AP is not encrypted, in the pop-up window, select "Connect" Start Connection;
8. If the AP is encrypted, enter the password in the pop-up window, and click "Connect" Start Connection;
9. When internet connections are successful, the wireless connection icon in the status bar appears.

## 2.10 USB connection

Device can connect to the computer, and then can copy files each other. If the devices with memory card, it will display two disks in the computer after connecting the computer. One is memory card, and the other is the internal device storage.

### Connect:

1. Make the device connected to the computer with USB data wire;
2. Now the device has been connected with the computer, then going to My Computer under removable disk devices can copy files among the internal device storage, SD card and the computers.

### Turn off:

Method 1.Tap MENU→Notification→Turn off USB storage, and then tap “Turn off” you can disconnect the device and the computer after the pop-up boxes.

Method 2.Click to move the letter icon on the computer, and select the security you can disconnect the device connected to the computer.

You can unplug the USB cable after disconnecting.

## 3. Input Operation

### 3.1 Keyboard

When you need to enter text and numbers using the program or file, the touch screen keyboard will appear automatically.

**Note:** This machine supports an external USB keyboard, but when using an external USB keyboard, some keys may not work properly.

### 3.2 Touch Screen

Touch Screen senses the finger trajectory and can do the following:

**Note:** Please do not place objects on the touch screen surface, it may be scratched or crushed.

**Click:** Select an icon to click, and then you can select the icon or option;

**Long press:** Select a single icon and do long press and then you can drag it to the desktop display.

**Drag and Drop:** Drag the desktop you can switch between the three interfaces.

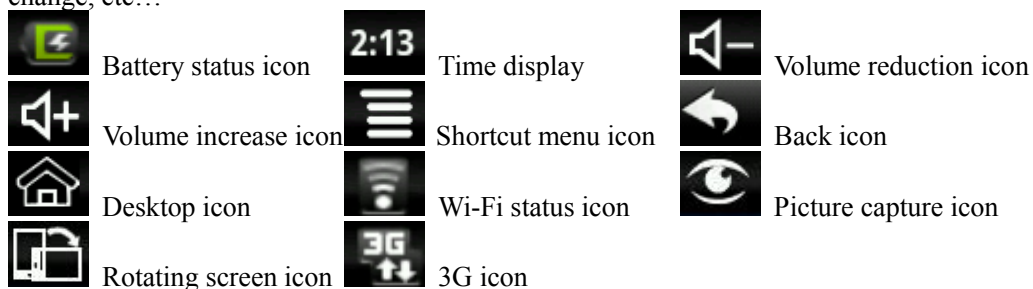

In the process of using the screen process you can use a pencil instead.

## 4. Desktop

### 4.1 Status Bar

The top screen for the status bar, display SD card, network, battery status, time and volume change, etc...

### 4.2 Shortcuts

On the desktop, press the MENU, bottom of the screen will pop up the shortcut menu. Menu items include: Add, wallpaper, search, notification, settings and hide. It shows like the following picture:

### 4.3 Current Desktop Lamp

The device Desktop has three dots light, that is, a total of three interfaces, the current interface will

display the green dot. If the indicator shows like , then the current in the second

interface.

## 4.4 A Quick Way To Add Gadgets

### Shortcuts

To add a shortcut to the main screen, press MENU → Add → Shortcut. Select the shortcut and then it can be added to the main screen. After adding you can click the shortcut icon on the main screen to do the corresponding shortcuts.

## 5. Web Browsing

Users can connect to the Internet through a browser.

Click the browser icon on the Desktop, and then you can open the Web browser.

## 6. Application Management

### 6.1 Install and Uninstall

#### Install

To install third-party software, please enter file browser first. And then find the APK file from the memory card, like the following picture:

Click iReader.apk like the above picture to pop up the install interface:

Click install button, and then the device will begin to install iReader. It shows like the following picture after installing:

Now the application is installed. Click open can open iReader directly and click done to back to the file browser.

### Uninstall

To uninstall third-party software installed, press MENU → Settings → Application → management application. Like the following picture:

Click the application you want to uninstall, like iReader on the above picture. It will pop up the

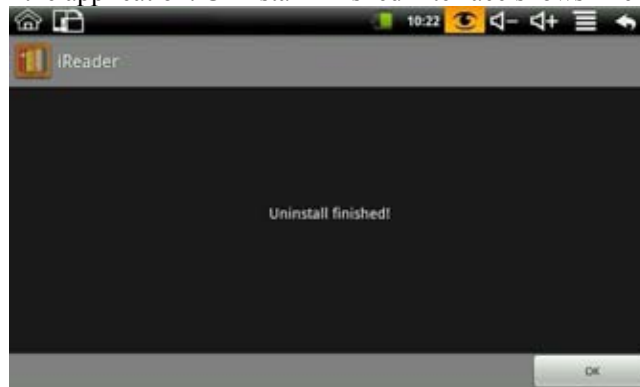

uninstall interface like the following picture:

Click Uninstall to enter the confirmation uninstall interface:

Click OK to uninstall the application. Uninstall finished interface shows like the following picture:

By now, iReader is uninstalled from the device.

## 6.2 Apps Store

Click Apps Store icon to enter the following interface:

You can click on the Featured, Categories, Top, Search and History to see the relevant

information.

Press MENU to pop-up shortcut menu as follows:

Click login, it shows like:

If no account, select register, and you need to enter E-mail, Account Name and password. The registration interface as follows:

If there is account, select the login, and enter the account number and password to login; it shows like:

After login you can enter the following interface:

You can choose to change password, change Email and save password. If you want to download the application software, you only need to click the icon on the following picture:

For example: click featured to enter the next interface:

Click the application you want to download to enter the details interface. Click download, it will pop up enter account password. Enter your account password after the start the download. The next picture is an example for Chinese Chess:

After the download is complete it will pop up installation tips automatically, click install the application can be installed on the device.

After installation is complete you can click history to manage the installed applications. As the following figure on history for the application:

The action could do with the application are: comment, open and uninstall.

Click comment you can comment with the application; click open you can open the application; click uninstall you can uninstall the application from the device.

## 7. Typical Applications Introduced

### 7.1 Chat Tools

You can download the chat tools such as FRING, QQ and MSN.

### 7.2 E-mail

Click the E-mail icon can enter the e-mail, and then you can proceed as follows:

1. Set e-mail account;
2. Open a new e-mail;
3. Send and receive e-mail.

**Note:** Press MENU to pop-up shortcut menu.

### 7.3 File Browser

Click the file browser icon to enter file browser interface:

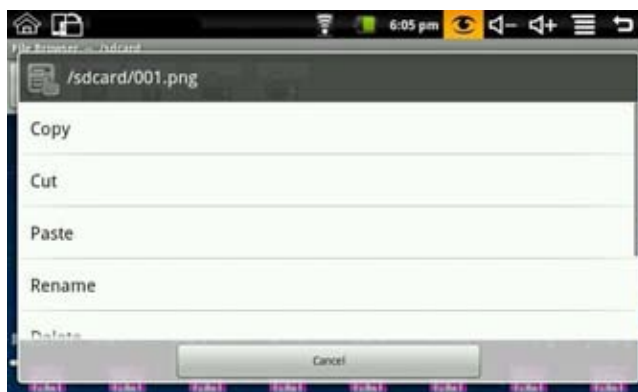

In the file browser, it can back to the previous , create new folder , switch to U disk “udisk” , switch to memory card “sdcard”  and switch to internal device storage “LocalDisk” .

**Copy files:**

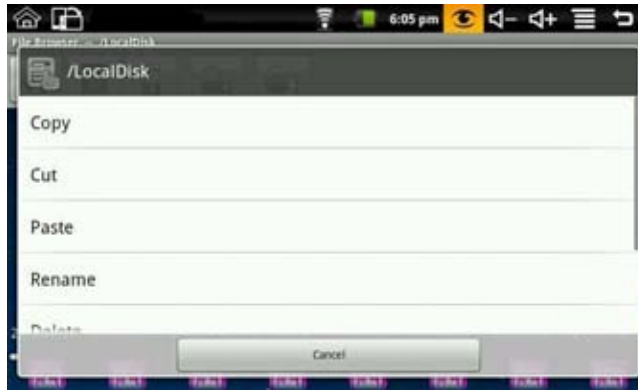

In the file browser, the internal device storage named “LocalDisk”; the memory card named “sdcard”; and the external U disk named “udisk”. If you want to copy files among memory card, U disk and internal device storage, please refer to the following actions:

Example: copy files from external U disk to the internal device storage.

1. Enter the file browser and click the memory card icon  to enter the sdcard folder;
2. Select the file you want to copy and press the icon for 2 seconds, then it will pop the following list:

3. Click copy;
4. Click the internal device storage icon  to enter the LocalDisk folder;
5. Long press the blank to pop the following list:

6. Click paste to paste this file into the current directory.

**Delete files:**

Select the file you want to delete and press the icon for 2 seconds, then it will pop an operating list. Select delete to pop the following confirmation delete dialog:

Click OK to delete the file.

**7.4 My Photo**

Click My Photo icon to browse pictures:

Click on any picture to enter slideshow mode. The mode can be full-screen pictures, rotate pictures, select the picture effect, change the picture arrangement, operation and slide play set.

Click to switchable arrangement of pictures;

Click can do delete and properties;

Select the delay time and then the device begin timing, after the timer it will capture the interface. The method applies to the full screen interface don't have the status bar to the desktop.

Immediate capture: click the picture capture icon on the status bar to capture the interface.

The method applies to the interface have the status bar to the desktop.

### 8.3 Battery Tips

As the device has a large screen, it will consume a lot of power. To extend battery life, you can reduce the frequency of use of the following features:

1. Watching videos, listening to music or take photographs;
2. Display brightness: Please press MENU → Settings → Sound & display (Display Settings) → Brightness (reduce the brightness);
3. Web Search: Please press MENU → Settings → Wireless controls → Wi-Fi settings → Network notification;
4. Wi-Fi use: Please press MENU → Settings → Wireless controls → Wi-Fi (turn off Wi-Fi).

## 9. Personalized settings

Click the settings on the shortcut menu can be personalized settings.

### 9.1 Wireless controls

Manage Wi-Fi and airplane mode

#### Wi-Fi

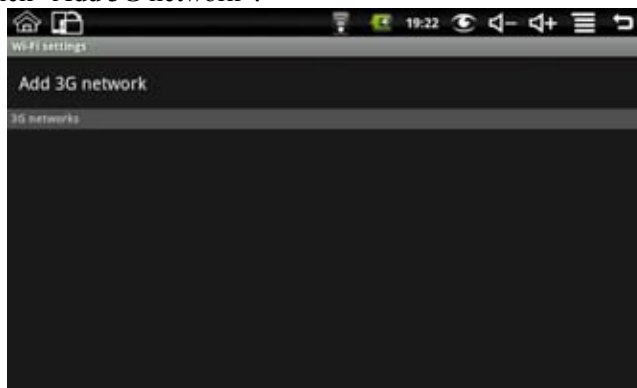

If you want to open and close the Wi-Fi, please press MENU → Settings → Wireless controls → Wi-Fi.

#### Wi-Fi Settings

If you want to set up and manage the wireless access point, please press MENU → Settings → Wireless controls → Wi-Fi settings.

#### 3G network settings

If you want to set up 3G network, please press MENU → Settings → Wireless controls → 3G network settings. Click “Add 3G network”:

Select device, input name, phone number, user and password and then click connect:

After connected to the 3G network, there will display a 3G icon  on the desktop status. It shows like:

### Airplane mode

If you want to set airplane mode and disable all wireless connections, please press MENU → Settings → Wireless controls → Airplane mode.

## 9.2 Pppoe settings

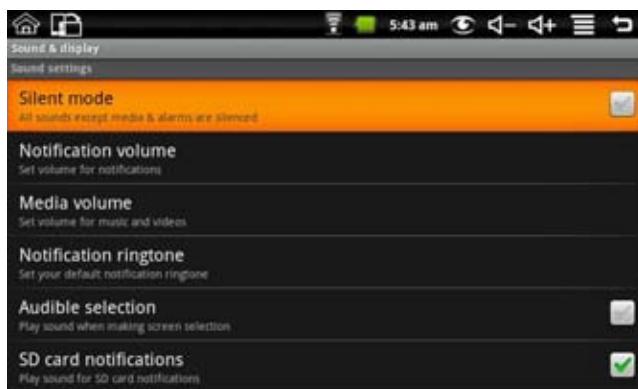

Connect broadband connection

Press MENU → Settings → Pppoe settings to enter. Input user name and password and then click connect to connect broadband connection.

## 9.3 Sound & display

Set ringtones, notification, and screen brightness.

### Silent mode

To make the addition to the media and the alarm clock, all located to mute the sound, press MENU → Settings → Sound & display (Sound settings) → Silent mode.

### Notification volume

To set the volume of inform, press MENU → Settings → Sound & display (Sound settings) → Notification volume.

**Media volume**

To set the volume of music and video, press MENU → Settings → Sound & display (Sound settings) → Media volume.

**Notification ringtone**

To set the ring of the default notification, press MENU → Settings → Sound & display (Sound settings) → Notification ringtone.

**Audible selection**

To make sound choices for the screen, press MENU → Settings → Sound & display (Sound settings) → operation sound choice.

**SD card notifications**

To make the SD card notification sound, press MENU → Settings → Sound & display (Sound settings) → SD card notifications.

If you choose “switch orientation automatically when rotating”, the interface will switch automatically when the device had rotated. If you don’t choose “switch orientation automatically when rotating”, there will display a rotating screen icon

on the status, and the interface will switch following the device only if you click the rotating screen icon.

**Animation**

To open and close the window to display animation, press MENU → Settings → Sound & display (Display settings) → Animation.

**Brightness**

To adjust the brightness of the screen, press MENU → Settings → Sound & display (Display settings) → Brightness.

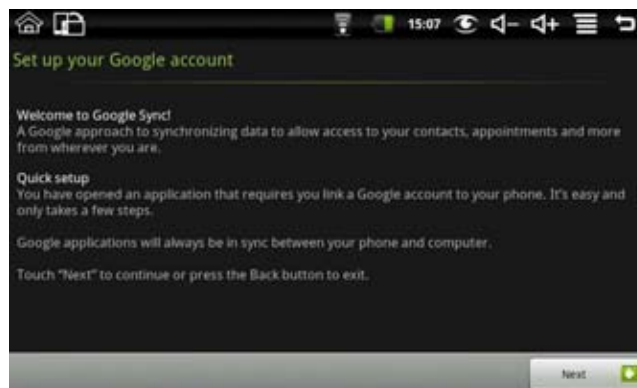

**Screen timeout**

To adjust the screen automatically turns off before the delay, press MENU → Settings → Sound & display (Display settings) → Screen timeout.

**9.4 Data synchronization**

Select which applications are synchronized

If you don’t sign in Google account, press MENU → Settings → Data synchronization to enter the next interface:

Click “Next”:

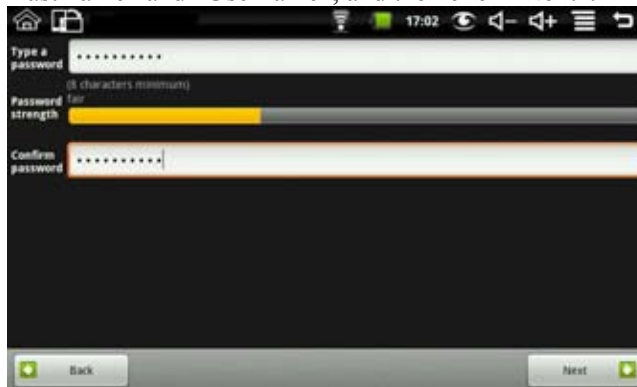

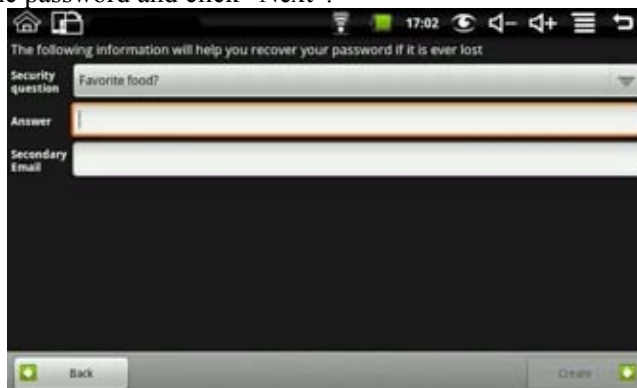

If you already have an account, please click “Sign in” and input “Username” and “Password” to login in. If you don’t have an account, click “Create”:

Input “First name”, “Last name” and “Username”, and then click “Next”:

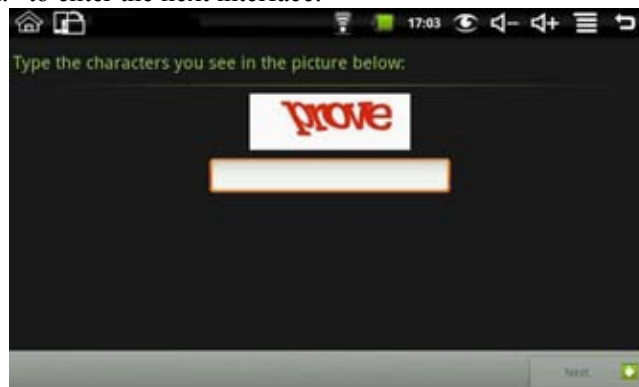

Input and confirm the password and click “Next”:

Select “Security question”, input “Answer”, input “Secondary Email” and then click “Create”:

Click “I agree, Next.” to enter the next interface:

Type the characters you see in the picture and then click “Next” to enter the next interface:

You can select which applications are synchronized in the above picture.

## 9.5 Applications

### Unknown Source

After checking it is allowed to install application which is not provided by the electronic market.

### Manage applications

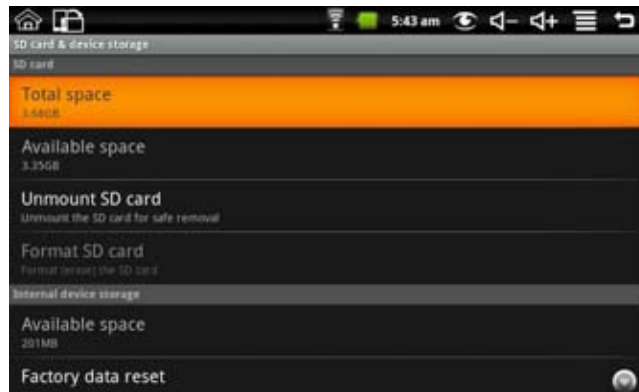

To manage and remove the installed applications, press MENU → Settings → Applications → Management applications.

### Development

To set options for application development, please press MENU → Settings → Applications → Development.

## 9.6 SD card & device storage

Unmount SD card, view available storage

### Total Space

Press the MENU → Settings → SD card & device storage → Total space, you can view the total amount of local disk storage and SD card.

### Available space

Press the MENU → Settings → SD card & device storage → Available space, you can view the available space of local disk storage, SD card and internal device storage.

### Unmount SD Card

To remove the SD card in a safe remove, press the MENU → Settings → SD card & device storage → Unmount SD card.

### Format SD Card

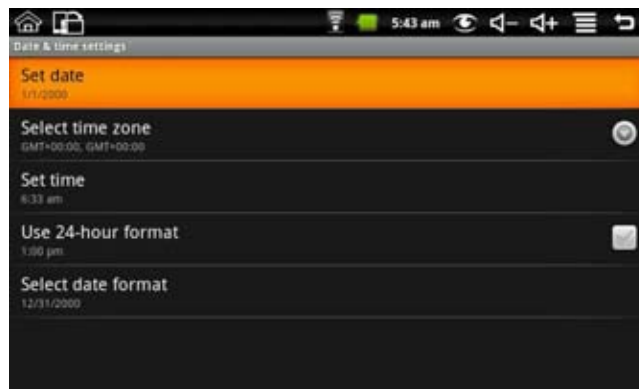

To format the (clear) SD card, press the MENU → Settings → SD card & device storage → Formatted SD card.

### Factory data reset

To restore factory settings, press MENU → Settings → SD card & device storage → Factory data reset.

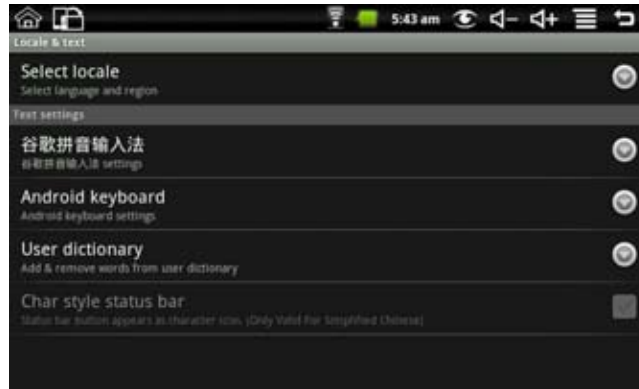

## 9.7 Date and Time

To set the date, time, time zone, time and format of the system, press MENU → Settings → Date and Time.

## 9.8 Locale & text

Set local (language and region), text input and auto-correction options

### Select local

To select the language and region, press MENU → Settings → Local &text → Select local.

### Android keyboard

To choose Android keyboard and do Android keyboard settings, press MENU → Settings → Local &text → Android keyboard.

### Google Pinyin Input Method

To select the Google Pinyin input method, and to set up Google Pinyin input method, press MENU → Settings → Local &text → Google Pinyin input method.

### User dictionary

To add words to the user dictionary and remove the word from the user dictionary, press the MENU → Settings → Local &text → User dictionary.

## 9.9 About device

### Status

To view the battery status, battery power, WIFI address and boot time, press MENU → Settings → About device → Status.

### Battery use

To view the power situation, press MENU → Settings → About device → Battery use.

### Legal information

To view the relevant legal information, press MENU → Settings → About device → Legal information.

### Model number

To view the model, press MENU → Settings → About device → Model number.

### Firmware version

To view the firmware version, press MENU → Settings → About device → Firmware version.

### Kernel version

To see the kernel version, press MENU → Settings → About device → Kernel version.

### Build number

To view the build number, press MENU → Settings → About device → Build number.

## 9.10 Touchpanel Calibration

If you want to calibration the touch screen, press MENU → Settings → Touchpanel calibration. Follow the prompts touch screen calibration, the calibration is complete there will be prompt and returns the corresponding list of settings.

## 10. MID Locked

**Screen / device lock:**

1. When screen idle (do not press any buttons), the device will lock the screen automatically in accordance with the system;
2. Short press the power button in any system interface can turn off the screen light and lock the screen.

**Screen / device unlock:**

1. Press Back or Menu to display unlock screen requirements;
2. If you have a set pattern or password locked, the system will ask you to enter the information.

## 11. Troubleshooting

### 11.1 Forced shutdown

Press and Machinery Power key for 5 seconds, device will force the shutdown.

### 11.2 Restore default settings

To restore the device to factory settings and clear all information, press MENU → Settings → SD card & device storage → Factory data reset.

**Warning:** Reset the device selected will delete Google accounts, system and application data and settings, downloading applications, please use this carefully.

### FCC WARNING

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help
