18<sup>th</sup> June 2018

Dear Sir,

In order to comply with the latest requirements of 47CFR part 95K, I hereby submit the required information for our MSLD device, rescueME MOB1. This device is already subject to an FCC grant under FCC ID XYEMOB1, granted under waiver.

Under 95.2991(b) MSLD must comply with all the applicable requirements of the RTCM standard 11901.1 dated June 4, 2012. Under advice of the FCC<sup>1</sup> Ocean Signal has completed the additional tests not covered by the first application.

Please note that there is a brand variant of this device covered by the same FCC ID, the ACR AISLink MOB. The AISLink MOB uses the same Electronic assembly in a different housing. Additional tests are hereby submitted to cover the mechanical differences in the housing.

Ocean Signal hereby requests that the documentation submitted with this application is reviewed and the required letter provided for submission of the class II permissive change to demonstrate full compliance with the rules of part 95K, noting that following the class II permissive change, the waiver listed on the current grant note no longer applies.

Signed on behalf of Ocean Signal Ltd.,

A handwritten signature in black ink that reads "D C Sheekey".

David Sheekey  
Type Approval and QMS Facilitator.

Enc.
