Subject: Extended Frequencies Justification for Certification of Transmitter with FCC ID: XYH-RDR2750U

Dear Sir/Madam,

This transmitter was designed to operate in following frequency ranges: 400-470MHz  
To aid equipment authorization in other countries which accept the United States FCC Grant for Certification, RCA Communications Systems is requesting that the FCC lists the frequencies 400-470MHz, under FCC Rule Part 90 on the FCC Grant.

RCA Communications Systems attests that the Digital Radio Base Station will not be marketed to USA users with the frequency band which is not allowed by the rule Part 90. Per the FCC's KDB634817 guidance, as an alternative to listing the exact frequencies, we acknowledge that it's a violation of the FCC Rules if this device operates on unauthorized frequencies.

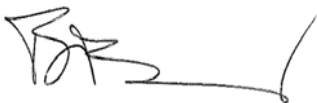

Frequency Range (MHz)	FCC Rule Part
406.1-450	FCC Part 90
450-454	FCC Part 90
456-460	FCC Part 90
460-462.5375	FCC Part 90
462.7375-467.5375	FCC Part 90
467.7375-470	FCC Part 90

Also, equipment programming is the responsibility of Authorized Service Personnel, the Digital Radio Base Station complies with 47 CFR Part 90.203(e), in that the operator cannot directly program the transmit frequencies using the normally accessible external controls.

Please contact me if you require any additional information.

Sincerely Yours,

Signature:
