Subject: Request for Dismissal of FCC ID Y36F2516

Dear Sirs/Ms.

By means of this letter, we request a DISMISSAL of the application with FCC ID: **Y36F2516** granted on 12/15/2010. The device concerned is a FM modulator authorized under FCC Rule Part 15.239 and has 4 frequency channels on 88.1, 88.3, 88.5 and **88.7** MHz.

The device tested and certified under the mentioned FCC ID was a hardware sample that contained one (1) wrong frequency channel at **88.7** MHz in the 4th channel. The correct 4th channel frequency must be **89.3** MHz.

Our goal is to re-use the same FCC ID with updated exhibits (with emissions of the correct hardware sample re-tested) using the correct frequency channels 88.1, 88.3, 88.5 and **89.3** MHz.

All plastic enclosures already produced have pre-printed the channels 88.1, 88.3, 88.5 and **89.3** MHz already.

For these reasons, we ask your permission for a DISMISSAL so that we can use the **same** FCC ID for the correct device going into production.

Yours truthfully,

Liao MeiHong

Liao MeiHong
Manager
