To whom it may concern,

The enclosed application is for original certification that the ThinkEco Modlet IQ ESP, model TE6010, is compliant with Part 15.247 of the FCC Rules. The Modlet IQ ESP (FCC ID Y38TE6010) is an energy-saving product which allows for remote switching of appliances and measurement of their power usage. The Modlet IQ ESP works in tandem with a USB Receiver that, when inserted into a computer with ThinkEco software installed, creates a wireless network in compliance with the ZigBee protocol to allow Modlet IQ ESP devices within range to communicate with the computer, completing ThinkEco's electricity-saving network system. The Modlet IQ ESP is specifically designed to extend ThinkEco's energy-saving technology to Electronic Systems Protection devices.

Enclosed, please find the necessary technical documents for certification.

Thank you,

A handwritten signature in cursive script that reads "Ben Burns".
