

TO WHOM IT MAY CONCERN:

We hereby declare the following:

Product: **SpiderCloud Radio Node (SCRN)**
Model numbers: **SCRN-200-244 and SCRN-200-244E**

We hereby declare that both the SCRN-200-244 and SCRN-200-244E operate in the UMTS Band IV (AWS).

- SCRN-200-244 ships with two integrated antennas only (gain 2.5 dBi each)
 - Only one antenna is used to transmit
 - Both antennas are used for receive
- SCRN-200-244E supports two straight TNC connectors and ships with two external omnidirectional antennas (gain 0.5 dBi each) only
 - Only one antenna is used to transmit
 - Both antennas are used for receive

The PCB and the associated components on the PCB are identical for both the models. The SW and firmware remain the same for both models. The only difference between the two models is the internal vs. external antennae.

Sincerely,

Tassos Michail
Director Product Management
