subject: Equivalence between ZBRT1 and ZBRTP

To Whom It May Concern:

We hereby confirm the similarity between two models of transmitter, ZBRT1 and ZBRTP. They are exactly the same in construction.

Basically, ZBRT1 has been created. There is also one transmitter model. When the transmitter is first operated, the receiver should start a process for an identification of the transmitter. Our Marketing team has created a package of one transmitter and a simplified receiver, they are appeared in our factory. In that case, it is not possible to operate any other transmitter than the one appeared in our factory. That's why we have given a second designation to the transmitter for the one appeared in our factory. It must avoid the customer to order any ZBRT1 in case of replacement or addition because this ZBRT1 will not be recognized by the receiver of the original package.

Sincerely,

Jean-Pierre LAIDET
In charge of Product Certification
