Albums of the options include:

➢ **View**: View the selected photos.
➢ **Browse style**: Setting the view model for the photo list model or matrix model.
➢ **Send**
   -- **To MMS**: selected photos to be in the form of MMS sent to the designated number.
   -- **To Bluetooth**: selected photos will be sent to the designated use Bluetooth phones.

➢ **Use as**
   -- **To wallpaper**: selected photos will be set to standby wallpaper.
   -- **To screen saver**: selected photos will be set up to screen the picture.
   -- **Caller picture**: selected photos will be set to calls Datoutie.
➢ **Rename**: Changing the name of photos.
➢ **Delete**: delete the selected photos.

- ➢ **Sort by**: In accordance with certain ways to sort photos.
- ➢ **Delete all files**: delete all photos.
- ➢ **Storage**: the phone or T_FLASH card.

4.6.4 Video recorder

Your phone to provide video recording functions.
Click on the "option" to:
- ➢ **Camcorder settings**: Select the menu to enter the video for some of the relevant parameters set.
  -- **EV**: There are nine kinds of settings for exposure.
  -- **Night mode**: You can turn on or off the night shoot mode.
  -- **Auti-flicker**: 50 HZ and 60 HZ two frequencies to choose from.
- ➢ **Lens Change**:Front lens and Back lens

➢ **White Balance**: according to different shooting environment can be set to "daylight" and "fluorescent" and "Cloud", can also choose to "auto", allows the phone to automatically adjust the screen shot.

➢ **Effect settings**: You can select a video based on special effects.

➢ **Storage**: the default settings video storage path.

➢ **Restore default**:restore default date

You can click touch-screen to dong these operation

4.5.5 Video player

Player interface click on the "option" and features are as follows:

➢ **Bluetooth settings**: a Bluetooth headset, the broadcast voice of the video output from the Bluetooth headset.

List of films in the document interface; click the "Options", functions as follows:

➢ **Play**: player selected in animation.

➢ **Send**: Bluetooth to transmit.

➢ **Rename**: Change the animation selected the file name.
➢ **Delete**: delete the selected animation.
➢ **Sort by**: the current folder sort of animation, in accordance with the name, type, timing, size or no.
➢ **Delete all files**: Delete all save the animation.
➢ **Storage**: the phone or T_FLASH card.

Note: Screenshots and speed playback only on AVI format video files to other formats of video files this feature is invalid. Video files stored in the default folder for Videos.

4.6.6 Audio player

Choice of music player into the MP3 player interface.
Click on the bottom left of the screen list of players to enter the list interface.
In the song list interface and then click on the bottom left of the screen a number of options-related songs into the set.
➢ **Play**: Play the current selection of songs.
➢ **Details**: View the song details.

➢ **Add to rings**: the current song to scenarios of the ring.
➢ **Refresh list**: update repertoire list.
➢ **Settings**: the multimedia player set.

-- **Pre.play list**: songs set the storage location and from the phone or T_FLASH card choice.

-- **List auto gen.**: the boot each time it automatically update the list.

-- **Repeat**: the repeat broadcast of the opening song.

-- **Shuffle**: Open the players are random order.

-- **Background play**: Open the menu with the music will not stop the withdrawal.

-- **BT stereo output**: you can use to open the Bluetooth headset to listen to music.

-- **BT stereo headset**: Bluetooth headset connected to display the name.

--**Lyrics display:** When setup broadcast music, whether display lyrics

4.5.7 Sound recorder

In the air interface folder, click the "option" to:
➢ **New record**: Click into the recording interface,

click interface of the "suspended", you can pause recording, click the "stop" access to preserve the interface, enter the file name after the preservation of recording documents.

➢ **List:** Look into have been already recorded of document, and select to broadcast

➢ **settings**: you can set up where you save the recording, preservation format and sound quality.

In a document recording interface, click the "option" to:

-- **Record**: function with the empty folder in the recording interface.

-- **Play**: Play recording documents.

-- **Append**: the original audio recordings and documents to be saved.

-- **Rename**: recording the name change.

-- **Delete:** delete audio files.

-- **Delete all files**: Delete all audio files.

-- **Settings**: the same function in the air folder interface settings.

-- **Forward**: will be forwarded to the document recording scenarios, Bluetooth, and MMS.

4.6.8 FM radio

Click on the status bar of the "frequency", you can view the FM radio channel received.
Click on "Options", to:

➢ **Channel list**: Show channels, and choice of players.
➢ **Manual input**: manually enter the channel.
➢ **Auto search**: Make sure the phone automatically enter the¬¬ channel after the search, and added to the list of channels.
➢ **Settings**: Can broadcast to the back ground, sound recordings format, orotund quality and storage area progress correlation setup.
➢ **Record**: Carry on sound recordings vs the current FM frequency channel
➢ **Append**: Can vs the sound recordings document that has been already recorded additional new sound recordings.
➢ **File list:** Display all sound recordings documents make a list.

4.7 Organizer

4.7.1Calendar

The phone you see the calendar feature, click on the "option" to enter sub-menu.

➢ **View tasks**: a new agenda. And add an alarm to remind it. You can choose other, conferences, courses, appointments, telephone, the anniversary of the five options. (If the alarm is not set for opening, when the time to remind the agenda, not tips)

Note: Some features need your support network operators.

4.8.6 Connectivity

4.8.6 .1 Bluetooth

➢ **Power**

Select to activate or deactivate Bluetooth.

➢ **Inquiry audio device**

Bluetooth active, select the search Bluetooth headset.

Bluetooth headset on-line:

    -- Activated Bluetooth

    -- Search Bluetooth Headset

    -- Show "to find devices", select "link."

    -- Enter a password (different Bluetooth headset password different, specific password, please check your Bluetooth headset manual)

    -- Asked whether on-line, select "Yes."

➢ **My device**

Show that the use of Bluetooth connections and the name.

➢ **Active device**

Show is the Bluetooth connection in the state.

➢ **Settings**

Bluetooth set when the relevant parameters.

➢ **About**

Show Bluetooth set of parameters.

Music player

4.8.6 .2 Data account

➢ **GSM data**:

-- **Account name**: The name of the account, select edit to edit.

-- **Number**: the account number.

-- **User name**: dial-up server (not WAP Gateway) account name.

-- **Password**: dial-up server (not WAP Gateway) password.

-- **Line type**: Select line style, analog or digital.

-- **Speed**: Choose the right speed.

-- **DNS**: IP address.

➢ **GPRS :**

-- **Account name**: The name of the account, select edit to edit.

-- **APN**: the importation of APN.

-- **User name**: dial-up server (not WAP Gateway) account name.

-- **Password**: dial-up server (not WAP Gateway) account password.

-- **Auth type**: Select certified encryption method.

4.8.7 Restore factory settings

Phone functions will return to the default settings. Password: 1122. Phone automatically shut down automatically after boot.

4.9 User profiles

4.9.1 General

➢ **Activate**: choose to turn into the general pattern.
➢ **Customize**: choose one set to enter the general pattern of self-definition. Function as follows:

--**Tone settings**: changes calls, alarm, the start-up, shutdown, news, ringtones, and other key tone type.

-- **Volume**: regulation ringtone and key tone of the volume.

-- **Extra tone**: Setting the tone of certain events. Warning sound, errors, network connectivity, such as sound or the call is connected.

-- **Answer mode**: setting any button response is open.and have cover answer

4.9.2 Meeting

Apply for meeting environment but it shall be preset (such as ring can be set up to "vibration").

4.9.3 Outdoor

Apply for outdoors actions but it shall be preset (such as volume can be set up to the highest status).

4.9.4 Indoor

Apply for indoors environment but it shall be preset.

4.9.5 Headset

Plug in your headphones automatically open this model. Individuals with the general mode of operation set up.

4.9.6 Bluetooth

A Bluetooth headset automatically opens this model. Individuals with the general mode of operation set up.

4.9.7 Power Save

This will enter in power save model, save power and extend you battery life.

4.10 Extra

4.10.1 Calculator

➢ Click on the screen soft keyboard input to calculate the figures and computing symbols. Click on the "=" or "OK" results.

➢ Click the "Clear" can remove the last bit of input or results, click the "Back to" withdraw from the calculator.

Note: This calculator accuracy is limited, will have a rounding error, especially in addition to countless times.

4.10.2Currency converter

Input a parities, reimport native or foreign money value, will display in another edit frame after recognizing value that you want.

4.10. 3 Stopwatch

You can use stop-watch timekeeping, the measuring distinguishes timekeeping or with ring timekeeping.Combine to is divided into general stop-watch

and face to the stop-watch two more.

4.10.4E-book reader

You can use this function to read TXT format of electronic documents.
E-book stores the default folder for the Ebook.
If the electronic bookshelf is empty folder, you can click on the "option" and select the "default", the "choice of where to store" in the choice of storage locations.
If you read the English documents, you can select the encoding "GB2312 (English)", the documents in different languages with different ways to read the code.
Click on the screen digital soft keyboard, can quickly enter the different functions of the set.

4.11 Services

4.11.1 STK

The function is from network providers.

If the SIM card and network providers do not support the kinds of services, this feature will not be able to use. For more information please contact with the network providers.

4.10.2 WAP

➢ **Menu features:**

    -- **Homepages**: Home landing. Home is the start of your connection settings set in the WAP site. If you do not have to set up, pre-set manufacturers will use the site.

    -- **Bookmarks**: Show has been the various bookmarks. Choice can be directly connected to the bookmark the Web site, editor of the signature, address edit or delete the bookmark.

    -- **Recent pages:** The records you by the Internet before the addresses of sites visited.

    -- **Offline pages:** Stored in the phone on the

    -- **Home**: Jump to the home page.

    -- **Bookmarks**: Show has been the various bookmarks. The choice can be directly connected to the Web site bookmarks, editor

of the signature, address edit or delete the bookmark.

-- **Links**: Jump to link by pointing to the address.

-- **Refresh**: Refresh the Web browser.

-- **Back:** to return to the previous one.

-- **Stop:** withdraw from the WAP browser window and return to the main menu.

-- **Disconnect:** disconnect the Web browser and Internet links

-- **Option:** Go to Settings menu.

✓ **Settings Home**: The current page is set to Home.

✓ **Save the image**: save the current page in the picture.

✓ **history**: theInternet before you record the addresses of sites visited by the

✓ **Documents**: management or open your browser stored in the local page

✓ **Settings**: the Web browser settings.

✓ **Push inbox:**the storage service providers over the news

Note: GPRS network support services needed to be opened later and a GPRS network coverage areas, in order to use GPRS services.

4.12 Shortcuts

In shortcut options you can easily reach function settings here. The shortcuts provide fast function setting access.

5   Input method

5..1 Thai   Input method

The Tai text inward keyboard concretely defines for:

FCC RF EXPOSURE INFORMATION:

WARNING!! Read this information before using your phone

In August 1986 the Federal Communications Commission (FCC) of the United States with its action in Report and Outer FCC adopted an updated safety standard for human exposure to radio frequency (RF) electromagnetic energy emitted by FCC regulated transmitters. Those guidelines are consistent with the safety standard previously set by both U.S. and international standards bodies. The design of this phone complies with the FCC guidelines and these international standards. Use only the supplied or an approved antenna. Unauthorized antennas modifications, or attachments could impair call quality, damage the phone, or result in violation of FCC regulations. Do not use the phone with a damaged antenna. If a damaged antenna comes into contact with the skin, a minor burn may result. Please contact your local dealer for replacement antenna.

BODY-WORN OPERATION:

This device was tested for typical body-worn operations with the back of the phone kept 1.5cm from the body. To comply with FCC RF exposure requirements, a minimum separation distance of 1.5cm must be maintained between the user's body and the back of the phone, including the antenna, whether extended or retracted. Third-party belt-clips, holsters and similar accessories containing metallic components shall not be used. Body-worn accessories

that cannot maintain 1.5cm separation distance between the user's body

and the back of the phone, and have not been tested for typical body-worn operations may not comply with FCC RF exposure limits and should be avoided.

For more information about RF exposure, please visit the FCC website at www.fcc.gov

Your wireless handheld portable telephone is a low power radio transmitter and receiver. When it is ON, it receives and also sends out radio frequency (RF) signals. In August, 1996, the Federal Communications Commissions (FCC) adopted RF exposure guidelines with safety levels for hand-held wireless phones. Those guidelines are consistent with the safety standards previously set by both U.S. and international standards bodies:

<ANSIC95.1> (1992) / <NCRP Report 86> (1986) / <ICIMIRP> (1996)

Those standards were based on comprehensive and periodic evaluations of the relevant scientific literature. For example, over 120 scientists, engineers, and physicians from universities, government health agencies, and industry reviewed the available body of research to develop the ANSI Standard (C95.1). Nevertheless, we recommend that you use a hands-free kit with your phone (such as an earpiece or headset) to avoid potential exposure to RF energy. The design of your phone complies with the FCC guidelines (and those standards).

Use only the supplied or an approved replacement antenna. Unauthorized antennas, modifications, or attachments could damage the phone and may violate FCC regulations.

NORMAL POSITION:

Hold the phone as you would any other telephone with the antenna pointed up and over your shoulder.

TIPS ON EFFICIENT OPERATION:

For your phone to operate most efficiently:

• Extend your antenna fully.

• Do not touch the antenna unnecessarily when the phone is in use. Contact with the antenna affects call quality and may cause the phone to operate at a higher power level than otherwise needed.

Vehicle mounted external antenna (Optional, if available))

A minimum separation distance of 7.9 inches (20cm) must be maintained between the user / by stander and the vehicle mounted external antenna to satisfy FCC RF exposure requirements.

RF Exposure Information:

FCC RF Exposure requirements: The highest SAR value reported under this standard during product certification for use next to the body with the minimum separation distance of 1.5cm is **0.430**W/kg, next to the head is **0.360**W/kg. This transmitter must not be collocated or operating in conjunction with any other antenna or transmitter.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:
(1) this device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful

interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-Consult the dealer or an experienced radio/TV technician for help

 Do not use the device with the environment which below minimum -10℃ or above maximum 50℃，the device may not work.

 Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
