Contents

1. Safety Information

⚠ Read this information before using your mobile device otherwise may result in personal injury or your device not complying with local laws.

PIN Code

Please don't turn on the PIN code function when use the two-card-standby, and notice the warning of the PIN degree when input the PIN code in other surroundings.

Battery

If a conductive material such touches the exposed terminal, short circuit may occur resulting in property damage, bodily injury or burn. To avoid risk of leaking electricity, take care when handling a charged battery particularly when placing it

inside your pocket, purse or other container with metal objects.

Keep your mobile device away from water

Keep your mobile device dry.

Use while driving

Always obey the laws and regulations on the use of mobile devices in the area where you drive. Give full attention to driving and the road; use hand-free operation or earpiece if a call is needed.

Aircraft

Mobile device may cause harmful interference so turn off your mobile device before boarding an airplane.

Blasting areas

Always obey the related limits and regulations and do not use your mobile device in blasting areas. Turn off your mobile device in areas posted "turn off electronic devices".

Potentially explosive atmospheres

Turn off your mobile device in the gas station and areas near fuel and chemical containers. Turn off your mobile device in areas posted "turn off electronic devices".

Medical devices

Turn off your mobile device whenever instructed to do so by posted signs near some medical equipment. Mobile device may interfere with pacemakers, hearing aids and some other medical transplanting equipment. Do not put your mobile device near pacemakers nor carry in the breast pocket.

Accessories and battery

Use the accessories, batteries and chargers approved by manufacturer. Use of batteries not approved by manufacturer may cause injury.

Emergency calls

Turn on your phone and keep it in service areas, dial emergency phone numbers and then press send key to make a call.

When losing your phone

To avoid any economy damage, please inform the Tele-communication Company or agencies to lock your SIM card when you lost your phone.

When you inform the telecom company or agencies to lock your SIM card they need to know the IMEI No. of your phone, which you can find printed on the label on the back of your phone when taking off the battery. Please backup this number for future need.

For safety consideration, you can make preventative measures such as set PIN Code for your SIM card to prevent other persons using your SIM card without your permission.

Keep away from children

Keep the phone, battery and charger away from children to avoid any personal injury.

2. Use and Care

To care for this mobile device, keep it away from:

Any kind of fluid

Keep the device away from water, rain, humidity, sweat or other moisture.

Extreme heat or cold

Avoid the temperature below -10℃/14℉ or above 45℃/113℉.

Microwave

Don't try to dry your phone in a microwave oven.

Dust and dirt

Don't expose your phone to dust, dirt, sand, food or other inappropriate materials.

Cleaning solutions

Use only a dry soft cloth to clean your phone. Don't use alcohol or other cleaning solutions.

Ground

Don't drop your phone.

3. Essential

3.1 Install the SIM card

Keep your SIM cards away from children.
Please consult your SIM card franchiser about the services and usage. SIM franchiser can be the service provider, network provider or other franchisers.
Please turn off your mobile device and disconnect it with charger before removing the battery.
Please don't turn on the PIN code function when use the two-card-standby, and notice the warning of the PIN degree when input the PIN code in other surroundings.
Note: turn off your mobile device and disconnect it with charger or any other device before removing back cover. Place the back cover on the phone before storage and use of your mobile phone.
Remove the back cover:
Press and slide the cover then get the cover off.
Insert the SIM card into the card slot:
Please insert the SIM cards with the golden contacts facing down.

SIM card

Note: Please notice the warning of the PIN degree when input the PIN code in other
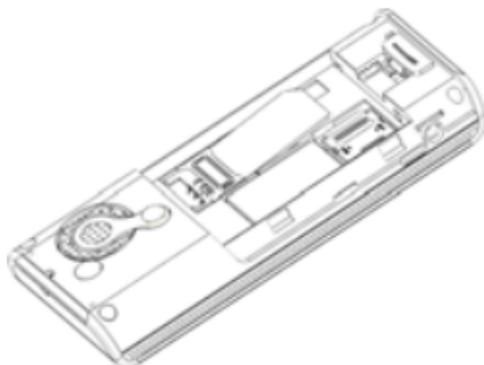

surroundings.

Note: This phone is dual SIM phone. When SIM is mentioned herein, we mean one of the two SIMs and you need to select SIM1 or SIM2.

3.2 Battery Use and Installation

Battery tips

Battery life depends on the network, signal strength, temperature, and accessories you use.

Always use original batteries and chargers. The warranty does not cover damage caused by non-original batteries, charger and/or accessories.

New batteries or batteries stored for a long time may take more time to charge.

When charging your battery, keep it near room temperature.

When storing your battery, keep it uncharged in a cool, dark, dry place.

Never expose batteries to temperatures below -10°C (14°F) or above 45°C (113°F).

Always take your phone with you when you leave your vehicle.

It is normal for batteries to gradually wear down and require longer charging time. If you notice a change in your battery life, it is probably time to purchase a new battery.

Never expose batteries to fire because they may explode.

Battery installation

1. Slide the back cover up and then remove the door.

2. Insert the battery with the connectors facing each

12
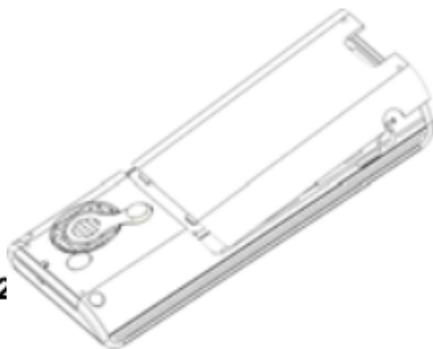

other. Close and slide the cover into place.

Charge the battery:
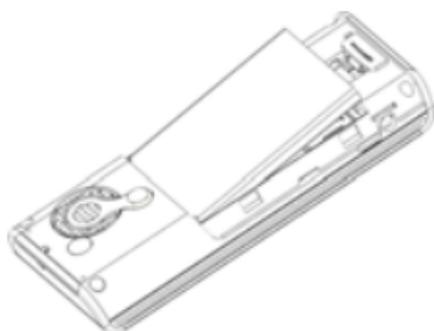

New battery is partly charged. Connect the charger to the phone. Your phone might require several hours to charge fully. Charging when power off may take a few seconds to show charging display and **Charging Complete** shows when finished.

Charging when power on, the battery icon flickers and becomes still when finished.

3.3 Memory Card

You can use removable memory card with your phone to store information.

Caution: Don't bend or scratch your memory card. Keep it away from static electricity, water, and dirt.

Insert the memory card into the tray as shown below:
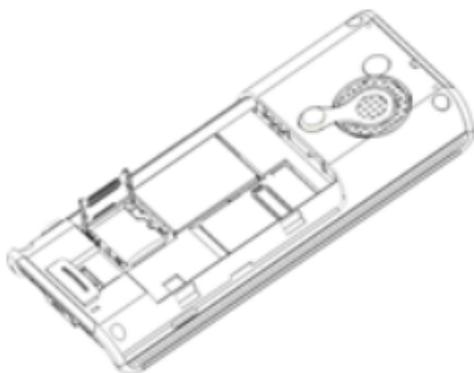

3.4 Turn it on/off

Caution: when power on, the phone may prompt you to enter

your SIM PIN code to unlock the SIM card. If "Input PUK code" shows, it means your SIM card is locked, please contact your web service provider.

To turn on your phone, press and hold the power on/off key for two seconds. If prompted, enter your six-to-eight-digit SIM PIN code and/or four-digit unlock code.

If you don't insert a SIM card, your phone shows "Insert SIM". None of the functions related to SIM card can be used and you can make an emergency call only.

To turn off your phone, press and hold the power on/off key for two seconds.

3.5 Make a call

1. Under the sleep mode, input the telephone number directly.
2. Press send key or tap the call key on the screen to make a call.
3. After calling, select Option-End or press the power on/off key or end key to end.

3.6 Answer or Reject a call

When there is an incoming call, the phone rings and /or vibrates showing the number or the corresponding name.

Non any key: Press the power on/off key or left soft key to answer a call. If you don't want to answer, you can press the power on/off key or right soft key; can also tap the rejection on the screen to reject.

Any key: Press send key or left soft key to enter option and then select answer to answer a call; In this mode, method of tapping the screen to answer or reject can use.

Earphone: when plugging the earphone, you can answer a call by pressing the key on the earphone; when you are not convenient to press the key, you can turn on the auto-answer mode (only in earphone mode) and make sure the earphone is plugged, your phone auto-answers a call 5 seconds after it rings and/or vibrates.

3.7 Operation during a call

Press Option to perform following operations during a call:

Hold:	Hold this call
End:	Hang up and end this call
New Call*:	Enter dialing display to make a new call
Phone Book:	Enter the phone book
SMS:	Enter messages

DTMF:	Set sending DTMF or not during a call
Swap*:	Switch between the active call and the call on hold
Conference*:	Add additional parties to a call.

Note: the menus marked with * must be supported by your SIM card. For details, please contact your service provider. Only when two or more calls are on can Swap and Conference show.

3.8 Insert international access code

When you are dialing an international call, press numeric key * till the international call prefix "+" shows and then enter the

number in the following order:
+ > Country code > complete number send key

3.9 Dial an extension or voicemail number

You need to enter P (pause) or W (wait) when dialing an extension number, press numeric key * to switch between 'P' and 'W'. You can enter numbers as following:
District code > exchange phone number > P or W > extension number >   send key

3.10 Emergency calls

You can make emergency calls as long as your current location is network-covered which you can know by checking the signal strength bar showing on the top left corner of the screen.

Note: Emergency numbers vary by country. The emergency number(s) in your phone may not work in all locations, and sometimes an emergency call cannot be placed due to network, environmental, or interference issues.

4. Basic

4.1 Display

Choose Flahslight, you can open or close if you need.

15. Input Method

The phone supports many input methods such as capital letter and small letter, smart English, numeric and so on.

15.1 English Input Method

English input method includes capital letter and small letter. The keys corresponding the uppercase and lowercase input separated by ";", and no semicolon separates show that the two input method correspondingly appear the same characters.

Numeric Key	Character
Numeric Key0	0，space
Numeric Key 1	1or symbols
Numeric Key 2	ABC2；abc2
Numeric Key 3	DEF3；def3
Numeric Key 4	GHI4；ghi4
Numeric Key 5	JKL5；jkl5
Numeric Key 6	MNO6；mno6
Numeric Key 7	PQRS7；pqrs7
Numeric Key 8	TUV8；tuv8
Numeric Key 9	WXYZ9；wxyz9
*Key	Select symbol
#Key	Switch input method

4-way navigation key up	Move up cursor
4-way navigation down	Move down cursor
4-way navigation left	Move left cursor
4-way navigation right	Move right cursor
Right soft key	Back or Clear

While using English input method, please follow this order：
Keep tapping one key till the desired character shows.
Press *key to find symbols.
Press # key to switch input method.
Press right soft key to clear the wrong character or go back.

15.2 Numeric Input Method

Handwriting and keyboard can use meanwhile in numeric input method. The definition of keys while using numeric input method:

Numeric Key	Character
Numeric Key0	0，
Numeric Key 1	1
Numeric Key 2	2
Numeric Key 3	3
Numeric Key 4	4
Numeric Key 5	5
Numeric Key 6	6
Numeric Key 7	7
Numeric Key 8	8
Numeric Key 9	9
*Key	Select symbol
#Key	Switch input method
4-way navigation key up	Move up cursor
4-way navigation down	Move down cursor

4-way navigation left	Move left cursor
4-way navigation right	Move right cursor
Right soft key	Back or Clear

While using Numeric input method, please follow this order：
Press numeric key 0-9 to input desired character or the number on the screen directly.
Press *key to find symbols.

Press right soft key to clear the wrong character or go back.

Malfunctions & Measures

Here list some malfunctions that may occur and measures. If the measures can't solve the problem please contact authorized after service center. Thank you!

Can't turn the phone on

Check battery installation, please install battery correctly
Check if battery level is low, change a battery or charge the battery
Check if enter incorrect PIN code 3times in a row. If yes, the phone is locked, then you should enter PUK code (please contact your network provider for PUK code)

SIM Card Void

When the phone shows "SIM Card Void", you can try the following:
Powers the phone off then restart to sure if can solve.
If your SIM card is a prepaid card, to sure whether the card is insufficient.
Please turn to your network provider, and to sure whether to be refused registration network by other reasons.

Weak signal or no signal

You may be in a location where the reception is bad, such as tunnel or cellar, please relocate and try again.
You can try turning around slightly or get near the window if you are in the room.

Bad talking quality

Weak signal, you can try solutions above.
Low battery, change a new battery or charge the battery.
Use up volume key to adjust microphone volume.

Can't make a call

Check if you enter the correct number and press send key.
Check if you set call barring, if yes cancel it.

Can't receive calls

Check if your phone is turned on.
Check if screen shows no signal, if yes, try solutions above.
Check if you set call barring, if yes, cancel it.

Screen is dark

Check if battery is low, change a battery or charge the battery.
Adjust the brightness in settings.
Your phone may be affected with damp, keep it dry.

Tips: if all suggestions and solutions can't solve your problem, please contact authorized after service center. Please do not disassembly or repair your phone without professional guide. Thank you!

Specific Absorption Rate Data
This model meets international guidelines for exposure to

radio waves.

Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves recommended by international guidelines. These guidelines were developed by the independent scientific organization ICNIRP and include safety margins designed to assure the protection of all persons, regardless of age and health.
The guidelines use a unit of measurement known as the Specific Absorption Rate, or SAR. The ICNIRP SAR limit for mobiles devices used by the general public is 2 W/kg.
As SAR is measured utilizing the device's highest transmitting power, the actual SAR of this device while operating is typically below that indicated above. This is due to automatic changes to the power level of the device to ensure it only uses the minimum level required to reach the network.
New phones must meet the international guidelines before coming into the market. The highest SAR value for this device when tested at the ear was 0.647 W/kg and the highest tested SAR value is 0.421 W/kg.

Information from the World Health Organization

The World Health Organization has stated that present scientific information does not indicate the need for any special precautions for the use of SAR Data mobile devices. They note that if you want to reduce your exposure then you can do so by limiting the length of calls or using a "hands-free" device to keep the mobile phone away from the head and body. Improvement of this device may cause a little change of the SAR data. However, the device is designed in accordance with the guidelines in any case.

Battery Tips

The machine is provided by the reusable rechargeable battery.

The new battery only can by two or three times full charge and discharge cycle to achieve optimum performance.

Battery can be recharged many times for repeated use, but it will eventually be exhausted. When the talk and standby time is significantly shorter than usual, then need to replace a new battery.

Use the battery the handset manufacturers approved only, and use the authorized charger for the battery charge only.

Cut off the power supply when do not use the charger.

Do not connect a battery to a charger more than one week, the long time charge will affect battery life.

The battery storage for too long would affect the results. And the battery will automatically discharge as long time unused.

Do not use a damaged battery or charger.

Never expose batteries to temperatures below -10°C (14°F) or above 45°C (113°F).

Always take your phone with you when you leave your vehicle.

It is normal for batteries to gradually wear down and require longer charging times. If you notice a change in your battery life, it is probably time to purchase a new battery.

Do not let the batteries short-circuit. When metal objects (such as: coins, etc.) directly connected to the battery anode and the cathode (with the metal side), will occur short-circuit accident. In the pocket or handbag carry a spare battery should be particularly careful. Short-circuit will damage the battery.

Please deal with the waste batteries according to the relevant provisions.

Never dispose of batteries in a fire because they may explode.

Product Maintenance

Your phone is a product with outstanding design and superior quality, please take good care using it. You are strongly suggested to take the following advice which should help you

stick to the warranty in order to extend the usage period of the product.

Keep your phone and its parts away from children.

Keep your phone dry. Keep it away from rain, damp or any kind of fluid.

Don't touch your phone with wet hands when charging or there may be bodily injury or damage to the phone.

Keep your phone away from extreme heat which can shorten your phone's life, damage the battery, twist or melt some plastic parts.

Keep your phone away from extreme cold because when the temperature grows up, water vapor accumulated from inside the phone may damage the electronic circuit.

Keep your phone away from dust and dirt.

Keep your phone away from ignited cigarettes, fire or heat source.

Don't disassemble your phone by yourself.

Don't drop, beat or shake your phone. Any rude treatment can damage the inner electronic circuit board.

Don't daub your phone because paint would jam-up the earpiece, microphone or any other removable part and disable your phone.

Clean the pc camera or screen with neat, soft and dry cloth. Don't use alcohol or other cleaning solutions.

If your phone, battery, charger or parts can't work, please take them to the authorized service center for help.

FCC RF Exposure Information and Statement

The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types: T100(FCC ID:Y7WPLUMT100) has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification for use at the ear is 0.647W/kg and when properly worn on the body is 0.421W/kg. This device was tested for typical body-worn operations with the back of the handset kept 1.5cm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 1.5cm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules.   These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-Consult the dealer or an experienced radio/TV technician for help.
