## 2. Basic Operation

### ● Start up and shut down

When you turn the key to ACC state, the system starts up with the corresponding logo (Vehicle eCarter: eCANTER/Vehicle TF: CANTER)  
You can use the system after home screen appears.

### Caution screen

Caution screen is displayed after the logo screen automatically.

Proceed to Home screen by following:

- 6sec timeout without operation
- Press "Accept" on caution screen
- Short press power button 
- Short press home button on panel key 

When you turn key from ACC to OFF state, the product shuts down simultaneously.

### ● Volume Adjustment

Rotate power button '  ' to tune volume when audio output is active. The volume control limit is 0-40.

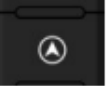

### ● Touch Screen Operation

The display is capacitive touch screen.

Please pay attention to the protection in use.

Do not touch screen with sharp objects, keep screen clean and if there is any water or oil on your fingers or on screen, the screen may behave abnormally.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modification warning. Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. End user must follow the specific operating instructions for satisfying RF exposure compliance. This transmitter must not be colocated or operating in conjunction with any other antenna or transmitter.

The portable device is designed to meet the requirements for exposure to radio waves established by the Federal Communications Commission (USA).

#### RF Exposure Information (SAR)

Listing of SAR values in user manuals or operating instructions is not mandatory. However, when SAR numbers are included, the information must be correct and consistent with those listed on the equipment certification grant. In some cases, when operating restrictions are necessary (for example, for use of body-worn accessories), the operating conditions and required minimum separation distance between the user and a wireless device must be clearly specified in the manual instructions for ensuring compliance.
