Subject: FCC Class II Permissive change for FCC ID: YAB-MSXSRDR.

To whom it may concern,

This is to request a Class II permissive change for module approval FCC ID: YAB-MSXSRDR originally granted on 08/15/2016.

The major change filed under this application is:

Change #1 The addition of an optional add-on for special encryption and decryption. The add-on contains no radios and oscillators. The only conceivable influence from the add-on on the XS reader radio, might be a minimal de-tuning of the 13.56 MHz antenna, due to close proximity from the add-on to the antenna. The performed tests have shown that this influence is undetectable.

Additional the XS reader is equipped with an alternative CPU IC8 from the same series and manufacturer with larger FLASH and RAM memory.

A new BOM of the XS reader and the schematic of the add-on will be provided with this filing.

Sincerely,

By: Marcel de Olde
