8.14 About the device

In this item, you can view the information on law, device status and software version.

9. Using HDMI

With HDMI, video contents being played by your Digix tablet can be transferred to other displays using the HDMI cable. Such as an LCD TV that has an HDMI port. The outputs the tablet supports can offer a maximum resolution of 720P. The related operations are as follows:

1. Power on your Digix tablet.

2. Connect Digix to HDMI monitor with HDMI cable and power on the monitor. At that time, on the status bar messages about HDMI connection will be pop up.

3. Play the video files on your Digix tablet.

4. Press MENU, and your tablet screen will turn black, a process lasting about 5 seconds during which the contents are being switched to HDMI monitor. Please be patient.

5. You can transfer the contents to the tablet again by any of the four ways below:

1) System transfers to tablet automatically after the playing is completed.

2) Press Menu during playing to switch the video contents to the tablet.

3) Pull out the HDMI cable during playing, after which the video contents will be transferred to the tablet.

4) Press Back to exit the playing mode, after which the video contents will be transferred to the tablet.

10. Locking the device
Unlocking screen/device:

When the system is the sleep mode, you can short press the power switch to enter the interface for screen locking. To unlock the screen, move the corresponding icon upward, and the system will enter the state prior to sleep mode.
11. Troubleshooting

11.1 Turning off applications

Once an application is turned on, it will occupy some space, and if there are too many applications that have been turned on, it will slow down the running speed of the device. Therefore you should close applications not being used in a timely manner, so that more space can be saved and the device run faster.

To turn off the application, click at the shortcut bar, and the system will enter the interface of system settings, where you can select Application → Running Services, as shown below:

DiGiX

Click the application to be closed, and the system will pop up a window which asks you if you need to stop the service window, as shown below:

Click Stop, and the application will be closed and disappear within the window being used.

11.2 Compulsory power-off

1. Press the power switch and hold down for 7 seconds, the device will be powered off in a compulsory way.

2. Press Rest at the right lower part of the device, the device will be powered off in a compulsory way.

11.3 Restore defaults

If you want to restore the factory defaults and delete all other data, please press System Settings → Privacy → Factory data reset.

Warning:
Once you select Reset, the Google account, data and settings of the system and application and the downloaded applications will be deleted. Thus, be careful when using this function.
