

Remote Control 8 Outlet Power Strip

*Easy to use remote control helps you
stop wasted stand-by power*

INSTRUCTIONS

1. Plug devices that need continuous power into the ALWAYS ON outlets by the cord end of the device such as DVR/TiVo® boxes and wireless routers.
2. Plug devices that do NOT need continuous power into any of the six REMOTE CONTROLLED outlets such as televisions, DVD players, gaming consoles, stereo systems, computer monitors and printers.
3. Plug the Remote Control Power Strip into a grounded, wall outlet.
4. Press the switch on the remote control to power ON your remote controlled devices. The GREEN LED light labeled "REMOTE" on the Power Strip will illuminate.
5. When finished using devices plugged into the remote controlled outlets, turn each device OFF as usual.
6. Then press the switch on the remote control to cut OFF standby power to these devices.
7. When you want to use these devices again, FIRST use the remote control to activate power into the Remote Controlled outlets.
8. Then turn ON the devices you wish to use.
9. REPEAT steps 5 & 6 as necessary.

WARNING:

For DRY INDOOR use only at temperatures above 0°C.

Do NOT use near water or liquid of any kind.

Do NOT plug the Remote Control Power Strip into anything other than a grounded, wall outlet.

Do NOT use the Remote Control Power Strip with extension cords.

Do NOT open the device or remove cover.

UNPLUG the device from wall outlet before cleaning.

CAUTION

Risk of Electric Shock. Do NOT plug into another relocatable power tap
Contains Always On Receptacles. To Reduce the Risk of Electric Shock - Disconnect Power Strip from power source before servicing any equipment connected to the Power Strip.

REMINDER

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
