**Request Modular Authority**

Clarity Design Inc. hereby request Modular Approval per DA 00-1407 and declares that the device meets the requirements as follows.

1. RF Shielding: The device has its own RF shielding.
2. Buffered modulation/data: The device has buffered modulation/data inputs on board.
3. Power Supply Regulation: The device contains a 3.3 Volt to 1.8 Volt power supply regulator to insure the transmitter only operates at 1.8 Volts.
4. Antenna requirement: The device complies with Section 15.203 and 15.204(c) antenna requirements. The antenna is permanently attached inside the module.
5. Stand-alone configuration: The device has been tested in a stand-alone configuration and meets all radiated emissions requirements. The module satisfies the AC line conducted requirements.
6. FCC ID labeling: The device is labeled with its own FCC ID number. Instructions are provided to the end user for labeling when the device is integrated into a system.
7. Operating Requirements: The device uses a complete 802.11b/g compliant radio transceiver and baseband.
8. RF Exposure: The device complies with all RF Exposure requirements.

Sincerely,

Robert Melucci  
Executive Vice President & CFO
