

Test Setup Photo

Test Setup	Radiated measurement for below 1 GHz (Front side)
	 A photograph showing the front side of a radiated measurement setup. A laptop is placed on a table in front of a wall covered with white, square-shaped electromagnetic wave absorbers. The laptop screen displays a software interface. Several metal rods are visible in the foreground, likely part of a measurement structure.
Test Setup	Radiated measurement for below 1 GHz (Rear side)
	 A photograph showing the rear side of the radiated measurement setup. The laptop is now closed and positioned on the table. The background wall of white absorbers is visible. The metal rods from the previous view are also present, providing a different perspective of the measurement environment.

Test Setup	Radiated measurement for Above 1 GHz (Front side)
	A photograph showing the front side of a radiated measurement setup in an anechoic chamber. A white test device is mounted on a white table. A laptop is open on the table, displaying a blue screen. To the right, a horn antenna is mounted on a stand, pointing towards the test device. The chamber walls are covered with white pyramidal absorbers, and the floor is also covered with absorbers. A yellow and black striped safety line is visible on the floor.
Test Setup	Radiated measurement for Above 1 GHz (Rear side)
	A photograph showing the rear side of the radiated measurement setup in the anechoic chamber. The white test device is on the table, and the horn antenna is positioned to the right, pointing towards the rear of the device. The setup is identical to the front side view, with absorbers on the walls and floor, and a safety line on the floor.

Test Setup	Conducted measurement (Front side)
	 A photograph showing a wooden table in a laboratory setting. On the table, there is a smartphone and a small black device with white tape. The background is a large, clear glass enclosure. To the right, there are some electronic components and cables on the floor.
Test Setup	Conducted measurement (Rear side)
	 A photograph showing the same wooden table from a different angle. A smartphone is on the table, and a black device with white tape is also visible. The background is the same glass enclosure. To the right, there are more electronic components and cables on the floor.
