

Installation of the AT1595-90 Antenna

1 Connecting Your Antenna

1.1 Connect cables to antenna

Uses supplied cables and connect both cables to the antenna. Use the supplied wrench to ensure a good connection.

1.1 Place antenna on roof of vehicle

Antenna should be located on the center of the roof having minimum clearance of 20cm's from edge of the car to ensure human exposure to radio frequency electromagnetic fields.

For best performance the antenna should be positioned on a flat portion of the roof of the car where it will have a clear, unobstructed view of the sky in all directions.

Note: Minimum distance from edges 20cm to ensure human exposure to radio frequency electromagnetic fields.
