Sub: FCC and ISED certification of the TX91501B transmitter

Dear Sir or Madam:

This letter is to inform you that the TX91501B RF transmitter is an updated version of the TX91501 (FCC ID YESTX91501) certified in 2010. The TX91501B transmitter is updated to replace obsolete parts. The performance and construction of the TX91501B is exactly the same as the TX91501. Re-certification is necessary due to changes to obsolete parts in the RF section. The TX91501B will replace the TX91501.

Sincerely,

Charles Greene, Ph.D.
