VT1006 – Editable ViewTag

VANGUARD
I D   S Y S T E M S®

PRODUCT DESCRIPTION

The VT1006 Editable ViewTag is a battery powered tag or badge for hanging or displaying relevant information. The users information can be updated using Bluetooth Low-Energy (BTLE) and is displayed on an epaper screen that can be read and scanned in broad daylight. The epaper screen uses no power when displaying information.

PROCESS FOR WRITING VIEWTAG

To write the ViewTag, you'll need a BTLE-capable smartphone or tablet running either iOS or Android, then follow these instructions:

- Download <application name> app
- Open <application name>
- Enter desired information into fields in app
- Press "Write Tag" button to initiate data transfer
    - App will prompt you to press button on ViewTag
- Press button on ViewTag
    - Green LED should illuminate on ViewTag, indicating that it's ready to receive data from the phone or tablet
- Wait for LED to extinguish and screen will update with new information
    - App will be ready for new information

PROCESS FOR CLEARING VIEWTAG SCREEN

It may be necessary to erase the screen of the ViewTag. To accomplish this, do the following:

- Press and hold the button on the ViewTag for at least 1 second
- Release button
- Press and release button again
    - Screen will flash twice and erase all information

PROCESS FOR RETRIEVING VIEWTAG SCREEN INFORMATION

If the ViewTag screen was erased accidentally, it is possible to retrieve the last written information and display it again. Just follow these steps:

- Press and hold the button on the ViewTag for at least 5 seconds
- Release button
- Press and release button again
    - Screen will update with the last written information
    NOTE: When attempting to clear the screen, if the button is held for longer than 5 seconds, the screen will update with the same info.

COMPLIANCE STATEMENTS

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. Use and maintain device only as specified in this manual.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies for FCC and Industry Canada RF radiation exposure limits set forth for general population. This device must be installed to provide a separation distance of at least 20cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter.
