Dear Mr. Leimer,

Please find our responses to your comments on this application below:

1) Submit a complete User's Manual

A revised user's manual has been uploaded to address an item for the Part 15 application. However, please note that the user documents uploaded originally are complete. This is a simple plug and play product requiring nothing of the user except to connect the power adapter and place the unit in their home or business such that the signal indicator illuminates.

2) Please explain how compliance is ensured in end-use installations for 27.50(d)(4) requirement of 10 m maximum antenna height.

This is not a fixed wireless device. It is a mobile device and only has an integral antenna. There is no way to connect an external antenna.

Best regards,

David W. Bare
