Attn: FCC Office of Engineering and Technology / UL Verification Services TCB

Ref: Class 2 Permissive Change for FCC ID: YGP4000-01

Original approval date: June 17, 2021

Additional C2PC dates: NA

Applicant: Crown Equipment Corporation

To Whom It May Concern,

This is to request for a Class II Permissive Change for FCC Certified Transmitter Module FCC ID: YGP4000-01 to add the following Host model numbers:

- HD 4100 Wearable Remote
- HD 4010 Truck Charger

As this new host is a portable host RF exposure data to demonstrate compliance with FCC requirements for the host/module combination is being provided in support of this application. The antenna on the wearable unit will be located greater than 2 mm from the user; The antenna on the truck charger will be greater than 20 cm from the user. The power output of the wearable remote has been reduced since it is worn on the hand. The RF exposure assessment also addresses colocation with other transmitters in the host.

As the module is only approved as a limited module because of a lack of shielding radiated emissions data for the host plus module has been provided to support this application.

The antenna is the same type and equal or lower gain to the antenna certified for use with the module. We have performed spot checks to verify that the combination of host and module remain compliant with the FCC standards applicable to the module.

If you have any questions regarding this application, please feel free to contact me.

Sincerely yours,

Ronald L. Ziegler
Director of Test and Compliance
