### Description of Models

HD4010 Featured below is an on-board truck charger that has a Bluetooth system. It charges and communicates with the HD4100.

#### HD4010

#### HD4100

The HD4100 called a “trigger” is a wearable transceiver which also is a Bluetooth system. It has an internal capacitor that stores energy instead of a battery. It is used as a remote to operate a truck as the operator is wearing this unit.

Sincerely Yours,

Ron Ziegler  
Director of Test and Compliance  
Crown Equipment Corporation
