remarks: 1. The dimensions marked in the figure are key control dimensions, and all trial production or mold samples need to be measured. 2. The dimensions marked with "*" are mandatory for IGC testing; Unmarked tolerances shall be controlled by referring to the tolerance table within the frame. 3. The line is less than or equal to 0.3mm and adopts exposure and level open technology. 4. Golden finger electroplating Ni: 2-7um Au: greater than 0.03um (salt spray must be passed for 48 hours). 5. The appearance should be smooth and not out to the internal circuit; exposed copper, etc. 6. The gold-plated area requires a 48 hour salt spray test (excluding OSP process). 7. All materials must meet RoHS 2.0+Pb requirements. 8. The packaging method adopts single PCS semi cutting for shipment. 9. Materials cannot be changed arbitrarily without confirmation from MMW company.
