

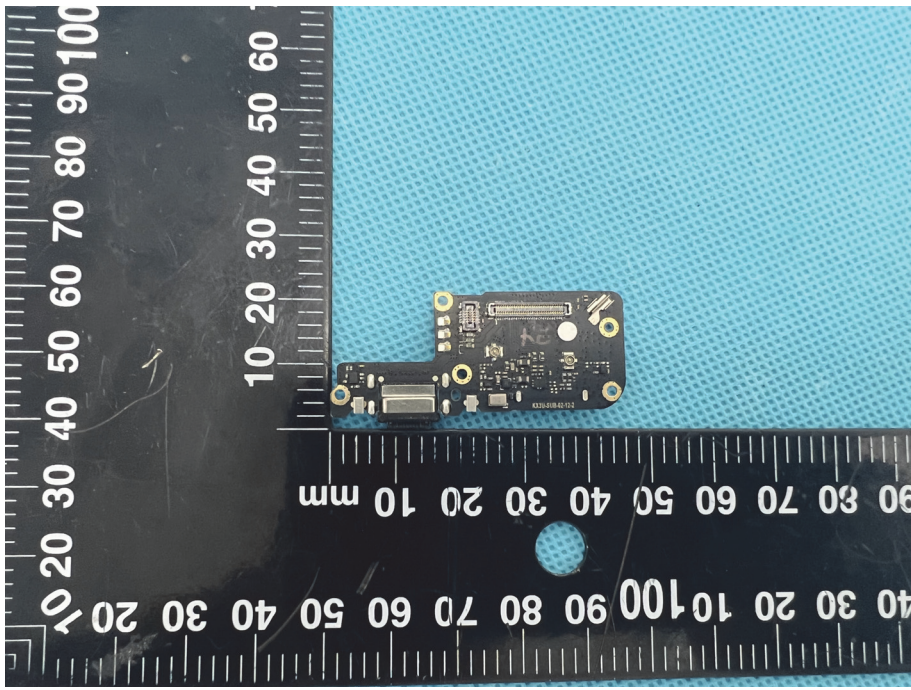

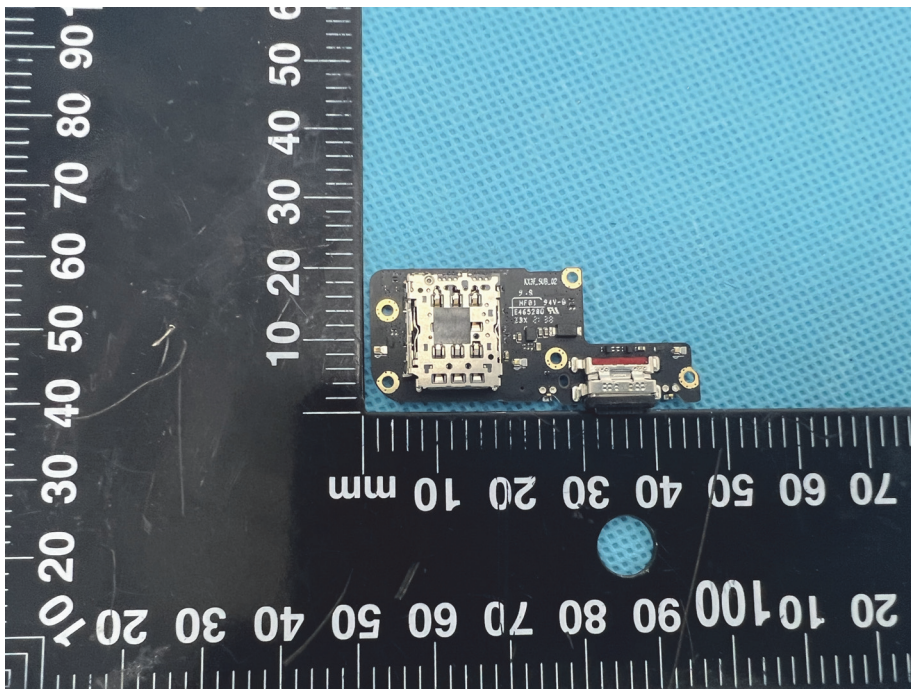

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

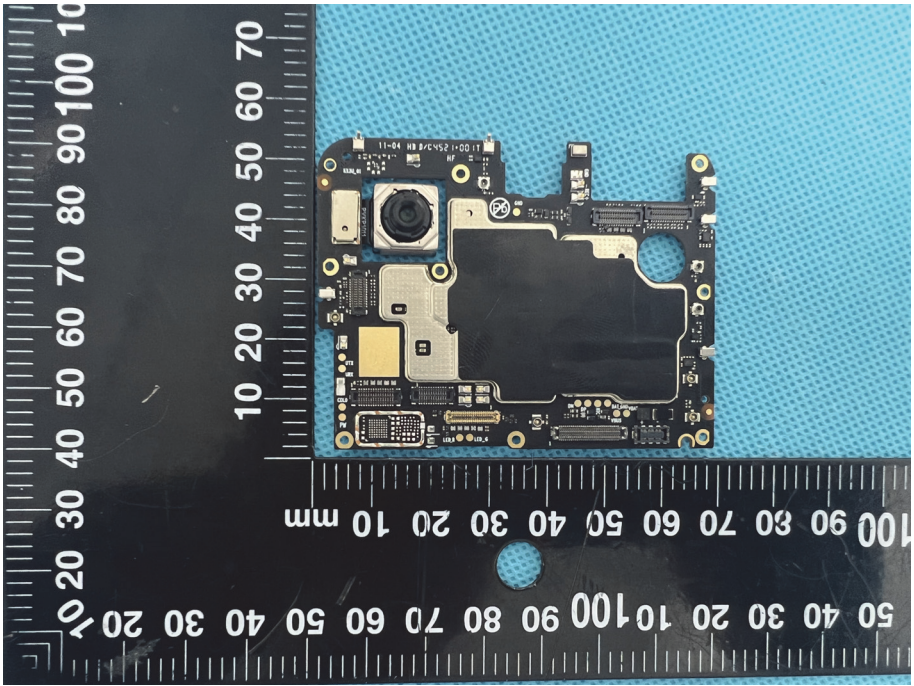

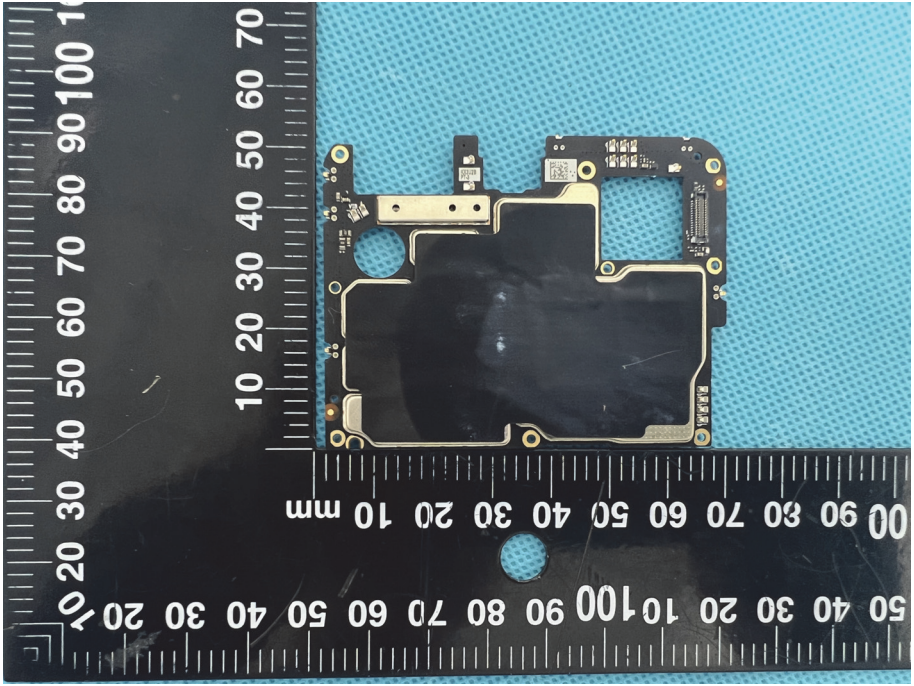

**EUT Housing and Board
View 1**

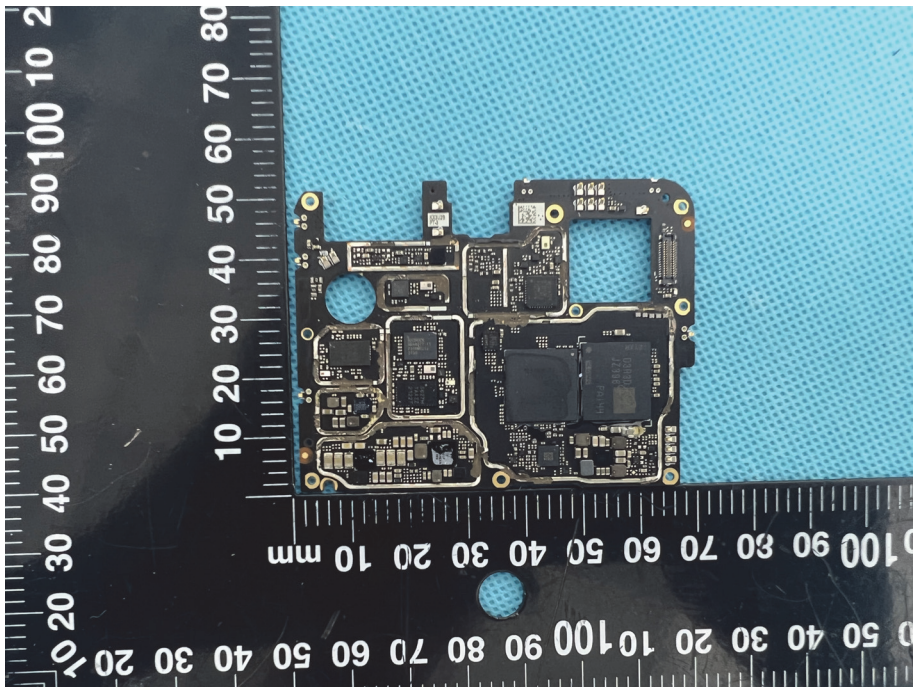

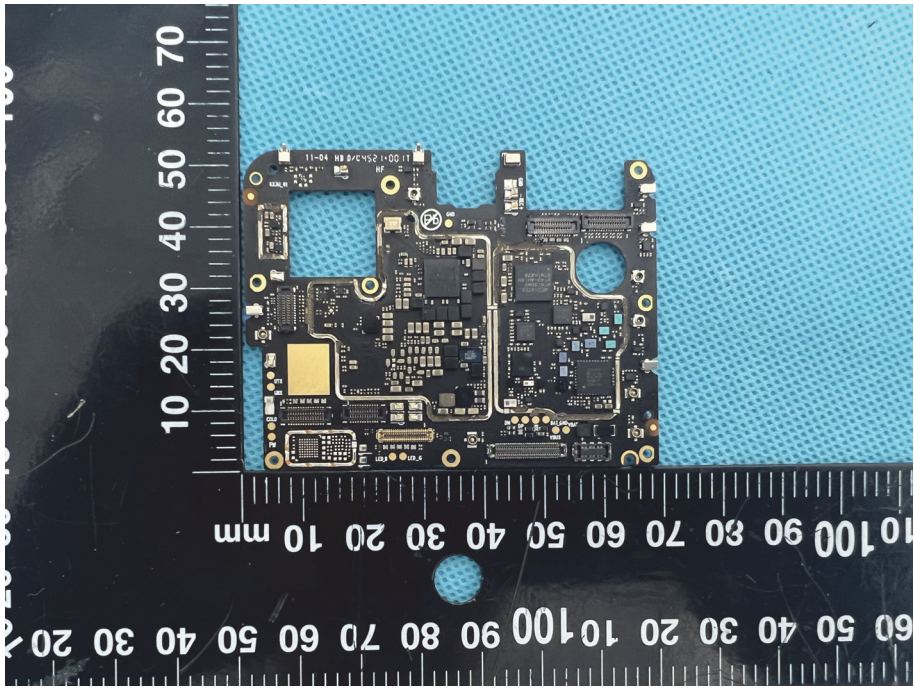

**EUT Housing and Board
View 2**

<p style="text-align: center;">Solder Board-Component View 1</p>	 <p>A photograph of a small, dark-colored printed circuit board (PCB) component. The component is rectangular with several gold-plated pins and solder points. It is placed on a blue textured surface. A black ruler with white markings is positioned to the left and bottom of the component for scale. The ruler shows measurements in millimeters, with the component's length being approximately 40 mm and its width approximately 20 mm.</p>
<p style="text-align: center;">Solder Board-Component View 2</p>	 <p>A photograph of the same PCB component from a different perspective. This view shows the underside of the component, revealing the solder joints and the components on the reverse side. The component is placed on the same blue textured surface. A black ruler with white markings is positioned to the left and bottom of the component for scale. The ruler shows measurements in millimeters, with the component's length being approximately 40 mm and its width approximately 20 mm.</p>

<p style="text-align: center;">Solder Board-Component View 3</p>	 <p>A photograph of a printed circuit board (PCB) component, likely a camera module, showing various electronic components such as a lens, sensor, and connectors. The board is placed on a blue textured surface. A black ruler with white markings is positioned below the board, showing measurements in millimeters. The ruler is oriented vertically, with the 0 mark at the top and the 100 mark at the bottom. The board is approximately 100 mm wide and 70 mm high.</p>
<p style="text-align: center;">Solder Board-Component View 4</p>	 <p>A photograph of the same PCB component from a different perspective, showing the back side of the board. The board is placed on a blue textured surface. A black ruler with white markings is positioned below the board, showing measurements in millimeters. The ruler is oriented vertically, with the 0 mark at the top and the 100 mark at the bottom. The board is approximately 100 mm wide and 70 mm high.</p>

<p>Solder Board-Component View 5</p>	 A photograph of a black printed circuit board (PCB) component, labeled as View 5. The board is irregularly shaped with several circular cutouts and is populated with various electronic components, including integrated circuits and capacitors. It is placed on a blue textured surface. A black ruler with white markings is positioned vertically to the left of the board, showing measurements from 0 to 100 mm. The board's length is approximately 100 mm, and its width is about 60 mm.
<p>Solder Board-Component View 6</p>	 A photograph of a black printed circuit board (PCB) component, labeled as View 6. This board is more rectangular than View 5 and features a large central cutout. It is populated with various electronic components, including a prominent yellow component on the left side. It is placed on a blue textured surface. A black ruler with white markings is positioned vertically to the left of the board, showing measurements from 0 to 100 mm. The board's length is approximately 100 mm, and its width is about 60 mm.
