

## **Circuit Description(Transmitter)**

This is a Remote Digital Meat Thermometer for house hold application. Devices operated under the provisions of this paragraph shall be provided with a means for auto-matched limiting operations so that the duration of each transmission shall be at least 30 times the duration of the transmission.

The function of the TX is to regularly measure the temperature to the IC U2, and the IC U2 processing and coding data from temperature sensor and transmit the data using wireless 433MHz to a standing alone receiving unit. For all description please read the enclosed user instruction manual.
