Subject: Professional Installation Information for the DeWalt DCT100 WiFi Access Point, FCC ID: YJ7DCT100 / IC: 9082A-DCT100

To whom it may concern,

The DeWalt DCT100 WiFi Access Point will require professional installation based on these points from KDB 353028:

- i) The grant of authorization will be revised to state “Professional Installation Required”.
- ii) The antennas used by the DCT100 are fixed, internal components and not exchangeable. The description of these antennas were included with the initial filing.
- iii)
  - 1) The DCT100 is only available for sale through authorized industrial/commercial distributors and is not available to the general public or by mail order.
  - 2) The DCT100 is marketed for sale only through the authorized industrial/commercial distributors.
  - 3) The re-filing of the DCT100 shall state that it is “for industrial/commercial construction use” and not for general public or consumer use.
  - 4) Per the FCC ruling for mixed indoor/outdoor use, the DCT100 is required to be professionally installed.
- iv)
  - 1) The industrial/commercial distributors will be instructed that the DCT100 must be professionally installed. The user manual is revised to include several statements of this requirement and a Training Manual for professional installation has been created.
  - 2) The industrial/commercial distributors will be instructed that the DCT100 must be professionally installed. The user manual is revised to include several statements of this requirement and a Training Manual for professional installation has been created.

3) Installation of the DCT100 requires the DeWalt user set-up instructions and a wireless device with the DeWalt app installed. The Training Manual for professional installation will provide instructions for the proper mounting and orientation of the DCT100 to meet the outdoor operation requirements.
