

Circuit Description of #92171

Circuit Description Of TX Part:

Press on the forward key by remote device,multivibrator circuit will produce code signal and the frequency is 1KHZ,Then adjust the forward key 's code signal to 27.145MHZ, and transmit the signal by antenna.

Press on the turn right key by remote device,multivibrator circuit will produce code signal and the frequency is 250HZ,then adjust the turn right key 'code signal to 27.145MHZ,and transmit the signal by antenna.
