

Quick Start Guide

VULKANO FLOW LC

Windows 7 and Vista

Compliance note:

• Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

• This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

• The antennas used for this transmitter must be installed to provide a separation distance of at least 20cm from all persons and must not be located or operating in conjunction with any other antenna or transmitter.

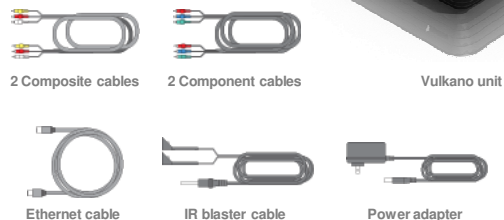

• Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device

Vulkano Setup for Windows 7 and Vista

Congratulations on buying Vulkano. We will take you through a few simple steps to get you up and running.

These steps are for setting up your Vulkano from a Windows 7 PC or Windows Vista PC. If you are using : follow the steps on the other side of !

What's in the Box

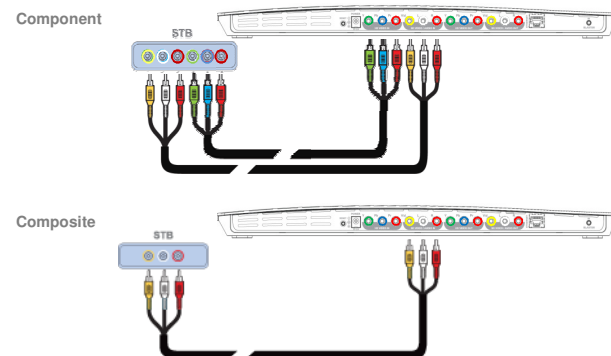

1. Connect Vulkano to Your Set-Top Box (STB)

Your STB has output connectors on the back for Component, Composite, or both. If you have both, use Component for better video quality. (You will need a Set-Top Box to use Vulkano)

➤ Connect audio and video cables from the STB "Output" connectors to Vulkano's video and audio "Input" connectors as shown. For Component, you will use two cables. For Composite, you will only use one

➤ Write down your STB brand and model number. You will need it later in the Setup

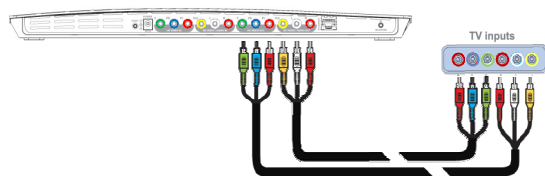

2. Connect Vulkano to Your TV

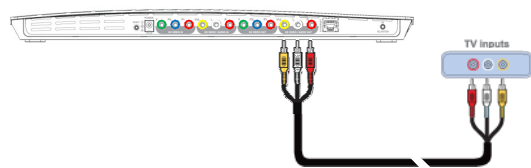

Your TV has audio and video "Input" connectors on the back or side for Component, Composite, or both. Make sure you use the same cable types, either Component or Composite for this connection as used in Step 1

➤ Connect audio and video cables from the Vulkano "Output" connectors to your TV's video and audio "Input" connectors as shown. For Component, you will use two cables. For Composite, you will only use one

Component

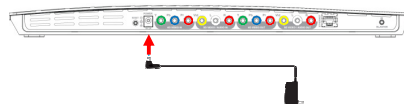

Composite

3. Power

➤ Plug the power adapter into Vulkano and a wall plug or power strip as shown

4. Vulkano Player

➤ Download Vulkano Player from <http://www.monsoonmultimedia.com/players.html> . Click on the "Download now" button for the PC Player

➤ Save Vulkano Player to your computer

➤ After download is complete, run Vulkano Player . (It takes a few minutes to download, and then a few more minutes to install)

➤ When asked, select "Run Vulkano Setup Wizard"

➤ Vulkano Setup Wizard will start and lead you through the remaining steps

If you have wireless setup problems

If you see the "Network Connection Lost" screen more than once, connect the Ethernet cable as described in the Mac/XP Setup process on the back of this Quick Start Guide

Players

PC

- Download Vulkano PC Player to your PC from www.myvulkano.com/players.html
- Install and run Vulkano Player
- Select Run Vulkano Player if you already set up Vulkano using your TV
- Enter the name and password of Vulkano
- Select Watch TV to get started

Mac

- Download Vulkano Mac Player to your Mac from www.myvulkano.com/players.html
- Install and run Vulkano Player
- Go to Player > Add/Select Player > Add to enter the name and password of Vulkano
- Go back to the Home screen and push Watch TV to get started

iPhone/iPad

- Download Vulkano Player to your iPhone or iPad from the App Store
- Go to Settings>Select to enter the name and password of Vulkano
- Go back to the Home screen and push Live TV to get started

Android

- Download Vulkano Player to your phone from Android Market
- Install and run Vulkano Player
- Go to Settings > Selected Vulkano > Add Vulkano
- Enter the name and password of Vulkano
- Go back to the Home screen and push Live TV to get started

Troubleshooting

If your STB is too far from Vulkano, or hidden from it, you can use the included IR Blasters. Plug the pin in the back of Vulkano and place the IR 'paddles' in front of the remote window on your STB. Additional information and technical support available at www.myvulkano.com/support.html

Vulkano Setup for Windows XP and Mac

Congratulations on buying Vulkano. We will take you through a few simple steps to get you up and running.

These steps are for setting up your Vulkano from a Windows XP PC or Mac. If you are using a Windows 7 PC or a Windows Vista PC, please follow the steps on the other side of this Quick Start Guide.

What's in the Box

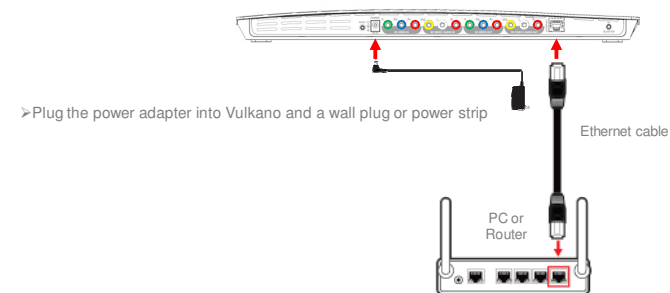

1. Network and Power

➤ During this first portion of the setup, we will use an Ethernet cable to connect to your Vulkano to your home WiFi network. Once it is on the network we will disconnect the cable and Vulkano can be used wirelessly

➤ Use the included Ethernet cable to connect from Vulkano to an open Ethernet connection; either to your router, your PC or an open Ethernet connection on your network

➤ If you have an Ethernet connection close to your STB, use this connection. Otherwise, move your Vulkano for this part of the setup. We will move it close to your STB in a few minutes

➤ If you do not have an open port, you should purchase a 4-port Ethernet switch or hub

2. PC Player

➤ Download Vulkano Player from <http://www.monsoonmultimedia.com/players.html> and save it to your computer

➤ After download is complete, run Vulkano Player. (It takes a few minutes to download, and then a few more minutes to install)

➤ When asked, select "Run Vulkano Setup Wizard"

➤ Vulkano Setup Wizard will start and lead you through the setup

➤ When the Setup Wizard tells you to "****", move Vulkano close to your STB, if it is not already there. It is OK to unplug the power and Ethernet connections from Vulkano

➤ If you moved Vulkano, reconnect the power in the new location

➤ Complete the cable connections described in Steps 3 and 4

➤ After the cables are connected, hit "Next" on the Vulkano Setup Wizard and complete the remaining steps

Mac Player

➤ Download Vulkano Player from <http://www.monsoonmultimedia.com/players.html>

➤ After download is complete, install Vulkano Player. (It takes a few minutes to download, and then a few more minutes to install)

➤ When Vulkano Player starts, select Player > Run Vulkano Setup

➤ Vulkano Setup Wizard will start and lead you through the setup

➤ When the Setup Wizard tells you to "****", move Vulkano close to your STB, if it is not already there. It is OK to unplug the power and Ethernet connections from Vulkano

➤ If you moved Vulkano, reconnect the power in the new location

➤ Complete the cable connections described in Steps 3 and 4

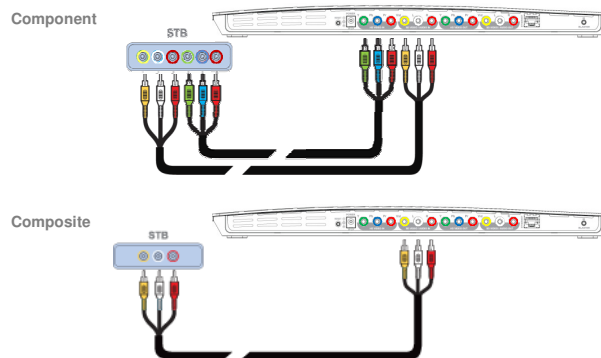

➤ After the cables are connected, hit "Next" on the Vulkano Setup Wizard and complete the remaining steps

3. Connect Vulkano to Your Set-Top Box (STB)

Your STB has output connectors on the back for Component, Composite, or both. If you have both, use Component for better video quality. (You will need a Set Top Box to use Vulkano)

➤ Connect audio and video cables from the STB "Output" connectors to Vulkano's video and audio "Input" connectors as shown. For Component, you will use two cables. For Composite, you will only use one

➤ Write down your STB brand and model number. You will need it later in the Setup

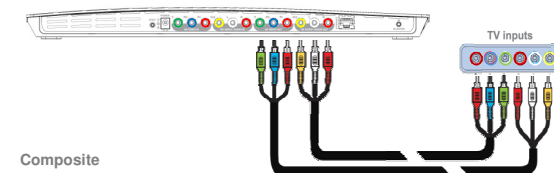

4. Connect Vulkano to Your TV

Your TV has audio and video "Input" connectors on the back or side for Component, Composite, or both. Make sure you use the same cable types, either Component or Composite for this connection as used in Step 1

➤ Connect audio and video cables from the Vulkano "Output" connectors to your TV's video and audio "Input" connectors as shown. For Component, you will use two cables. For Composite, you will only use one
