2. Function Menu

■ 2.1. Information

2.1.1. Write Message

You can use this function write a short message. Enter the information you want to send, you can send, input, advanced options, save drafts and other operations.

■ Send: Edit the information interface, when the

editing information is complete, if you are a direct recovery information to the recipient, then enter the recipient's number display screen, and then click send; if new information is sent into the phone book to select a number .

- Input Method: You can choose English capital, lowercase, digital input and other input method.
- Ssave: save the message to the Drafts section.

2.1.2. Inbox

Store your received messages.

Choose a message, you can view, reply, call, forward, delete, delete all, save, tag and other operations.

- View: You can view the contents of the selected message.
- Re: reply message to the sender.
- Call: Call the sender.
- Forward: The article text messages to other contacts.
- Delete: delete the article text.

- Delete all: Delete all text messages.
- save: choose which messages to save to the SIM card or mobile phone.

2.1.3.Outbox

Failed to send the message store, select a message, you can view, resend, edit, delete, delete all, check the information status, information operations.

2.1.4.Drafts

Store the edited text. Choose a message, you can view, send, edit, delete, delete all other operations.

2.1.5.Sent

Store text messages sent successfully. Choose a message, you can view, forward, delete, delete all other operations.

- View: View the article text.
- Forward: forward the message to others that article.
- Delete: delete the article text.
- Delete all: delete all messages sent mailbox.

2.1.6.Delete information

You can select the Inbox, Drafts, Outbox, Sent messages, delete all the information.

2.1.7.Cell Broadcast

Press the left soft key to enter the cell broadcast interface, you can proceed as follows.

- receive mode: Turn on or turn off cell broadcasting function.
- channel settings: Optional add, delete, edit the original channel.
- Language: choose to receive broadcasts in all languages.

- read information: press the left soft key can read the received broadcast information.

2.1.8.Setting

Pattern is set, voice mail, information validity, status settings, storage state, the preferred storage location, such as the preferred connection option.

2.2.Phone Book

You can save names and phone numbers on the SIM card or mobile phone and other information.

2.2.1.View contact

Contact interface in the view, select a contact, press "Options" to enter the option list interface, the interface in the list of options you can do the following operations.

- View: View the selected call record details.
- send SMS: You can send SMS to this number.
- Call: call this number directly.

- IP Dial-up: the selection of the directory number for dial-up IP.
- Edit: the selection of the telephone directory business card information to re-modified and saved.
- Delete: the phone number from the phone or SIM card removed.
- copy: the SIM card or mobile phone, copy the number.
- Mobile: The mobile phone records from the phone to the SIM card or From SIM card to mobile phone.
- caller groups: group name can be edited, select the ringtones, pictures, to highlight the personality characteristics of the group, when group member calls, you can set the display to show the distinction between individual groups.

2.2.2. Phone book settings

View phone book set in the interface, click "Options" to enter the option list interface, the interface in the list of options you can do the following operations.

- preferred storage location: Select location for a SIM

card or phone or both.

- Speed Dial: You can turn on or off speed dial feature, set the speed dial list.
- my number: I edit my phone number.
- other numbers: Edit other phone number.
- Storage Status: Display the SIM card, phone memory status.
- Copy contacts: all the phone numbers from your SIM card to phone or from phone to SIM card.
- mobile contacts: all the phone numbers from your SIM card to mobile phone or from phone to SIM card.
- Delete all contact: Remove the SIM card or phone all the numbers.

2.3.Call Center

2.3.1. Call History

Display your recent call history.

Dialed

Shows you a list of recently dialed phone numbers.

Interface in the list of dialed numbers, press the "option" to enter the option list interface, the interface in the list of options you can do the following operations.

- View: You can query the record details, including name, number, call time, talk time and other information.
- Call: call this number directly.
- send SMS: You can send SMS to this number.
- save: You can add the number to the SIM card or phone.
- added to the blacklist: the phone calls which have been added to the blacklist.
- Call editor: to Add the numbers have been recorded in the phone book.
- Delete: deletion of the article has been dialed.

Received calls

Showing you has recently received a list of phone numbers. Operation with the dialed phone.

Missed calls

Indicates that you have not recently received a list of phone numbers. Operation with the dialed phone.

All phone

Displays a record of all telephone numbers.

Operation with the dialed phone.

2.3.2.Call setting

My numbers

Set the number as a local number. Whether to support the function and stored on your SIM card number.

·May lead to an explosion in any place, such as gas stations, chemical plants, the user turn off the phone.

·Comply with the restrictions on using wireless devices.

FCC Warning:

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules.

Operation is subject to the following two conditions: (1)

This device may not cause harmful interference, and (2)

this device must accept any interference received,

including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses

and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

—Reorient or relocate the receiving antenna.

—Increase the separation between the equipment and receiver.

—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

—Consult the dealer or an experienced radio/TV technician for help.

Specific Absorption Rate (SAR) information

This wireless phone meets the government's requirements for exposure to radio waves.

The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health.

The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/Kg.
