

User Manual

Product Name: 4G LTE PHONE

Brand: nyx mobile

Model: HIT

Dear Customer,

Thank you for choosing our 4G LTE PHONE. This 4G LTE PHONE incorporates the latest world advanced functions, enabling simple and convenient operation, satisfying your special requirements.

In addition to common multimedia functions this phone also provides you with a variety of value added functions like WIFI, Bluetooth, hi-speed internet browsing. With this manual, you can acquire full understanding of the usage of this phone.

Protect our environment! We strive to produce products in compliance with global environmental standards. Please consult your local authorities for proper disposal.

Note: User's Manual is used to guide the user about the functionality of the phone. This does not seem any certificate of technology. Some functions may vary due to modifications and up gradations of software or due to print mistakes.

Manufacture: Shenzhen qianhai aibo Science and
Technology Ltd.

Safety precautions

Please read and follow these concise rules carefully to prevent danger or breaking laws.

Driving safety

Do not use 4G LTE PHONE when driving. Use the hands-free accessories if you have to use the phone. Put the 4G LTE PHONE in the holder, instead of the passenger seat or any place that the phone will fall off.

Power off in aircraft

The interference of 4G LTE PHONE will affect the flight safety and it is illegal to use 4G LTE PHONE in aircraft. Please switch off you 4G LTE PHONE before boarding.

Power off in the operation area of explosion

Please follow the regulations or rules and switch off your 4G LTE PHONE in or near operation area of explosion.

Power off near dangerous articles

Please turn off your 4G LTE PHONE at gas station or places near fuels and chemicals.

In hospitals

Please follow the regulations or rules of hospitals when you use 4G LTE PHONE there. Switch the device off near medical equipment. Any wireless device, including 4G LTE PHONE, will interfere with the medical devices which are not fully protected. Other electronic devices also may be affected. If you have any question, please consult your doctor or the manufacturer.

Interference

Any 4G LTE PHONE might be interfered with and its performance will be affected thereby.

Professional service

Only qualified maintenance personnel can install or maintain this 4G LTE PHONE. It may cause serious danger and also violates warranty clauses if you install or maintain the 4G LTE PHONE by yourself.

Accessories and battery

Use manufacturer approved accessories and batteries only.

Rational application

Use the 4G LTE PHONE in normal way. Do not put your 4G LTE PHONE in the environment with too high temperature (higher than 60°C), for example, put it under the window which is irradiated by sunshine directly. Please use wet or antistatic cloth to clean your phone. Do not use the cloth with static to wipe the phone.

Emergency call

Make sure that the 4G LTE PHONE is switched on and in service area, enter the emergency number (e.g. 110) and press the Call key to call the number. Report your position and explain your condition briefly. Do not end the call without permission.

Note: Like other 4G LTE PHONES, the characteristics of this phone may be not supported because of the network coverage or wireless signals transmission. Certain networks even don't support emergency call. Therefore, do not depend on 4G LTE PHONE only for very important communication (e.g. medical emergency). Please consult your local network operator.

| Power key | Press this key to lock screen; Long press this key to select silent mode/airplane mode/switch off. Long press this key to power on the phone when it is off. |
| Menu key | Open menus in different interface. |
| Back key | Press this key to go back to last interface. |
| | |

Getting started

First call

- 1> Insert the SIM cards (switch off the phone at first). For detailed installation guide, please refer to “Installing the SIM card”.
- 2> Charge the battery. Refer to “Battery and charging”.
- 3> Press and hold the Power key to switch on the 4G LTE PHONE.
- 4> Enter area code and telephone number in the dial interface and then press the call key to dial out by SIM1 or SIM2 .

Note: Before using the 4G LTE PHONE, please insert valid SIM cards and charge the battery.

Installing SIM cards

When you register 4G LTE PHONE, You can apply for a telephone number card .

The SIM card saves the parameters required by the communication, and personal information, including PIN code (personal identity number), contacts, short messages and other system services.

Warning: Do not bend or scratch the SIM card, or contact static, dust or water; if the SIM card is lost, please contact your network operator. Please switch off the 4G LTE PHONE before installing the SIM card. The SIM card is inserted into the rear side of the 4G LTE PHONE.

Note: The SIM card is tiny. Please keep it away from children to avoid swallowed. If the SIM card is invalid or damaged, the phone displays “Insert SIM card”. Switch off the phone and take out the SIM card, and then re-insert it into the slot properly. If the SIM card is damaged, please contact your network operator. If the SIM card is locked, please contact your network operator.

Installing memory card

Because the mobile space is limited, you may need to install a memory card (SD card).

To install the SD card: Aim the SD card card slot, forward to push the SD card into the card slot to install the battery after the boot can be read to the SD card and use.

Take out the SD card: sliding backwards can take out the SD card.

Note: SD card is tiny. Please keep it away from children. Please select qualified SD cards, such as SANDISK, V-DATA, and Transcend. Please match with the 4G LTE PHONE when you purchase the card.

Battery and charging

Installing the battery

Only use qualified battery and accessories. When the battery isn't used, put it in the protective case.

Note: Please operate according to the instructions to avoid damaging the battery contact.

Charging the battery

The new battery will reach its optimized performance after complete charging and discharging for several times. Please charge in time when the battery voltage is low. Over discharging will damage the battery. Disconnect the charger from the AC power supply and the 4G LTE PHONE after charging. While charging, the battery status icon flashes from right to left, and stops flashing after charging. It is normal that the battery becomes warm in the charging process.

Battery status

Your 4G LTE PHONE can monitor and display the battery status.

- 1> You can check the battery status from the icon in the upper right corner of the screen.
- 2> If the electricity is insufficient, the "Low Battery" prompt shows up. The 4G LTE PHONE sends warning tone if the "System alert" in Profiles is activated.
- 3> During charging, the icon of battery status blinks until the charging completes.

Note: The actual standby time and call time depend on the operation, local network, and settings of the SIM card and 4G LTE PHONE.

Using battery

The performance of the battery is affected by various factors, including wireless network settings, signal intensity, environment temperature, the function or settings that you select, accessories and the mode of voice, data or other applications that you select.

To keep the battery in optimum performance, please follow the rules below:

- ◆ The charging of new battery or batteries which haven't been used for long time may be longer;
- ◆ Keep the battery in room temperature when it is being charged;

- ◆ It is normal that the charging time becomes longer after long time using. If the call time becomes shorter and charging time becomes longer after normal charging, you need to change a qualified battery. Unqualified battery may damage your phone and cause danger.
- ◆ If the battery is left unused for too long time or the battery voltage is too low, it takes certain period of time to display the charging interface normally when the charger is connected.

Note: To protect your safety and the environment, do not dispose the battery randomly.

Warning: The short circuit of battery may cause explosion, fire or body hurt.

▲ Precautions of using battery

- 1> Switch off the phone before removing the battery.
- 2> Use the battery carefully. It will cause short circuit to connect the anode (+) and cathode (-) of the battery with metal objects (coin, clip, etc.), and damage the battery and metal objects. When the battery is removed and put in the bag, do not contact the anode and cathode of the battery with metal objects (e.g. keys).
- 3> Do not put the battery in fire, or use in any place with high temperature.
- 4> Do not disassemble or refit the battery.
- 5> Do not put the battery in the place with strong mechanical impact or break through with hard object.
- 6> Store the battery in cool and dry place, and avoid high temperature (> 60 °C) and direct sunlight.
- 7> Stop using if there is any particular smell or overheating.
- 8> Stop using the battery if there is any crack, distortion or electrolyte leakage.
- 9> If the electrolyte stains the skin or clothes, please wash with soap and clean water immediately; the electrolyte enters the eyes, wash with clean water immediately and go to see the doctor.
- 10> Do not use the battery in low temperature, in which the battery can't get the maximum standby/call time.
- 11> Do not wash the battery with water or organic solvent, or put it in water.
- 12> Fully charge the battery if it won't be used for a long time.
- 13> You are recommended to return wasted batteries to the manufacturer of 4G LTE PHONE or put them in the specified public recovery area of wasted batteries. Do not put them together with other garbage or dispose casually.

▲ Using 2-in-1 charger (charger + data cable)

The 2-in-1 charger may charge the battery through the 4G LTE PHONE.

- 1> Connect the data cable and charger
- 2> Connect the data cable of the 2-in-1 charger to the I/O slot of the 4G LTE PHONE.
- 3> Connect the charger plug of the 2-in-1 charger to the appropriate power outlet.
- 4> During charging, the icon of battery status blinks until the charging completes.
- 5> After charging, the battery icon stops flashing, and you can pull out the 2-in-1 charger.

Note: If the battery voltage is too low and can't turn on the 4G LTE PHONE, the charging icon may appear on the screen after several minutes. The 4G LTE PHONE may be turned on or off during charging.

Warning: Make sure that the local voltage and power match the rated voltage and power of the 2-in-1 charger.

Switching on/off

- 1> Press and hold the Power key to switch on the 4G LTE PHONE. The screen shows the power on video.
- 2> Access to main screen interface.

3> Press and hold the Power key to select switching off the 4G LTE PHONE.

Using hands free kit

With the hands free kit, you can make or answer calls without holding the 4G LTE PHONE. When you insert the hands free kit into the earphone port, the hands free kit can be used as the handset and the microphone of the 4G LTE PHONE.

Keypad lock

When the keypad is locked, the 4G LTE PHONE will be locked automatically if there is no operation in certain period of time. To unlock: Press the Power key

Note: When the keypad is locked, it will be invalid. If there is new call, you can answer as usual, and the 4G LTE PHONE will resume the locked status after the call

Language and input methods

The 4G LTE PHONE provides many languages such as English, French, Arabic and Hindi. And the phone provides Android keyboard input methods.

Calling

Making Calls

Call

- ◆ Enter area code and phone number and press call key to dial out by SIM
- ◆ Use the clear key to delete if there is wrong input. Long press clear key to clear all characters.

Note: Obstacles give lots of effects on calling quality; moving around in a small range will improve signal strength effectively.

Making an International Call

Press * key for twice and sign “+” will come out. Then enter country code, area code and phone number (without a

zero in front of 4G LTE PHONE number) in the dial interface. Then press call key to dial out.

Dialing extension

Some extension numbers of fixed line couldn't be dialed directly. You need to dial telephone exchange first and then dial the extension number. Type in a P symbol between telephone exchange number and extension number, this phone will dial the extension number automatically. Follow below method to make a symbol P: short press * key for three times. Then it will display a P symbol on screen.

Making a call from the phonebook

Open the phonebook list, scroll to search the desired number, press call key to dial out by SIM.

Latest numbers redial

Enter call logs and press the up/down key to reach (or click) the desired number or name and press call key to dial out by SIM

Receiving Calls

To receive an incoming call, you can slide the slider to choose "answer". To increase or decrease the volume in the process of calling, press the up or down side key, during a call to choose mute, small keyboard, H-free , add Calls, Hold, contacts need to press the main button, and then click the icon to enter.

Rejecting Calls

To reject an incoming call, you can slide the slider to choose "reject".

Emergency call

You can always make emergency call when you are in the coverage area of the network (you can know by checking the indicating stripe of network signal intensity on the upper left corner of the screen). If your network operator doesn't provide roaming service in your area, the characters of "EMERGENCY CALLS ONLY" will appear on the screen and you could only make emergency call. If you are located in a service area of the network, emergency calls can also be made without a SIM card.

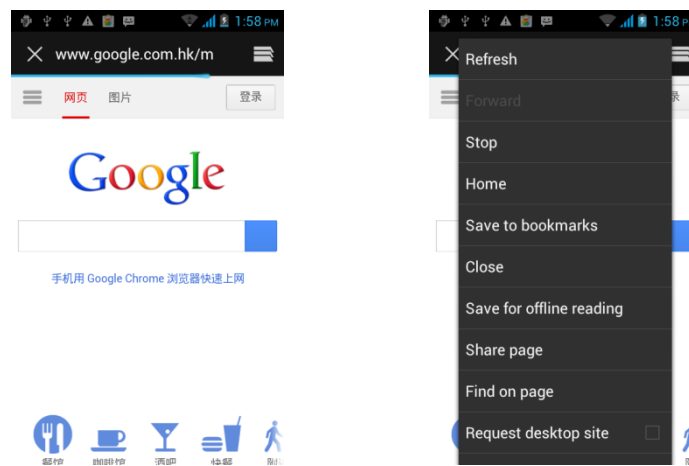

Application menu

5.1 Browser

This phone supports wireless LAN (WIFI), WAP services, and SIM card network. You should make sure to apply for SIM card network successful before using the network services.

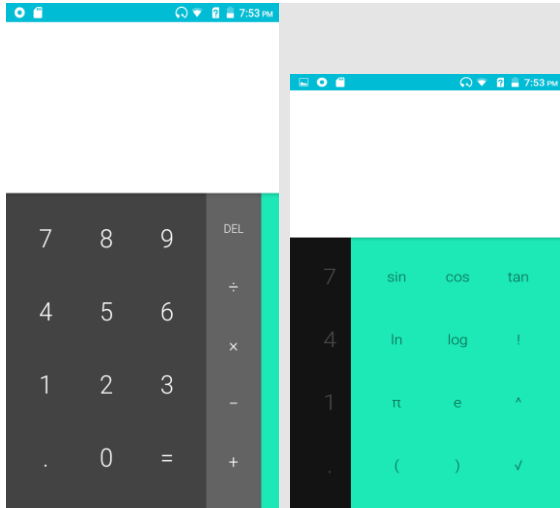

- Refresh: Refresh current website.
- Backward: Back to the website you have visited.
- Forward: Forward to the website you have visited.
- Stop: Stop open the website.
- Home: Go to home page.
- Save to bookmarks: Open the bookmark list; select a bookmark to browse, create, edit, set the home page or delete the bookmarks.
- Close: You can close and choose minimize or quit.
- Save for offline reading: Save website for offline reading.
- Share page: Share page by Bluetooth, email, Gmail and so on.
- Find on page: Find page by enter website link.
- Request desktop site: Request desktop site instead download mobile version.
- Bookmarks/History: the record which you have visited before.
- Settings: Settings for Internet browsing. You can set general, privacy& security, accessibility, advanced, bandwidth management and labs.

Note: GPRS service requires network support, must to be open network service and in a GPRS network coverage area, in order to use GPRS services.

5.2 Calculator

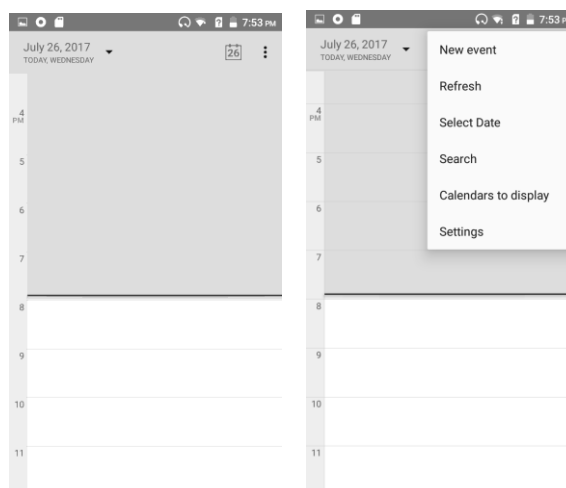

You can select numbers and symbols on the screen as required. Press the number keys 0-9 to enter the number you want to calculate, and then press the "." Key to enter the decimal point. Such as +, -, ×, ÷; press "=" to get the results. The interface in the lower right corner of the calculator interface Tap the screen finger to the left to bring up the advanced symbol

- full-screen playback / original size
- parameter setting; set parameters
- playback mode: you can select a single cycle, all the cycle, not loop
- Channel settings: set the left and right channels

You can select headphone / speaker switch when inserting headphones

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- ▶ -Reorient or relocate the receiving antenna.
- ▶ -Increase the separation between the equipment and receiver.
- ▶ -Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- ▶ -Consult the dealer or an experienced radio/TV technician for help.

Specific Absorption Rate (SAR) information:

This 4G LTE PHONE meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health.

FCC RF Exposure Information and Statement

The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types: 4G LTE PHONE (FCC ID: YPVITALCOMHIT) has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification for use at the ear is 0.323W/kg and when properly worn on the body is 1.220W/kg. the Hotspot SAR value is 1.220W/kg, the simultaneous transmission SAR value is 0.452W/kg on the head and 1.369W/ kg on the body. This device was tested for typical body-worn operations with the back of the handset kept 10mm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 10mm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

Body-worn Operation

This device was tested for typical body-worn operations. To comply with RF

exposure requirements, a minimum separation distance of 10mm must be maintained between the user's body and the handset, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.
