## 1 Safety Precautions

Read and abide by the instructions set forth as below to avoid dangers or violation against the law.

### **Drive safely at all times**

Do not use a hand-held phone while driving. Park the vehicle first.

### **Switch off the phone when refueling**

Do not use the phone at a refueling point(service station) or near fuels or chemicals.

### **Switch off in an aircraft**

Wireless phones can cause interference. Using them in an aircraft is both illegal and dangerous.

### **In hospital**

Hospitals or health care facilities may be using equipment that could be sensitive to external radio frequency energy. Follow any regulations or rules in force.

### **Your Device**

### **Interference**

All wireless phones may be subject to interference, which could affect their performance

### **Special Regulations**

Meet any special regulations in force in any area and always switch off your phone whenever it is forbidden to use it, or when it may cause interference or danger.

### **Sensible use**

Use only in the normal position (held to your ear).

### **Accessories and batteries**

Use only approved batteries and accessories.

### **Qualified service**

Only qualified service personnel may repair your phone.

## 2 Your Mobile Phone

Our company reserves the right to make modifications to the contents of this manual without any prior notices.

### 2.1 Keys and functions

Name		Functions
Center key		Enter the main menu interface
Right soft key		Enter the phonebook; carry out the corresponding operations displayed on the right bottom of the screen.
SIM1 Send key / Left soft key		Answer, dial, receive calls for SIM1
SIM2 Send key		Answer, dial, receive calls for SIM2
End key		Short press: return to standby interface in any mode Long press: Power off(Power on in power off state)
Direction keys		You can switch the shortcuts of the standby interface
Numeric keys	1	Short press: go to number input screen and input number 1 Long press: go to voicemail menu
	0, 2~9	Short press: go to number input interface, and input numbers 0, 2~9.
	*	Short press: go to number input screen and shift input *
	#	Short press: go to number input screen and input #

Note: In this manual, “short press” a key means press then quickly release the key; “long press” a key means press the key and hold for not less than 2 seconds

### 3 Get Started

#### 3.1 On/off

Long press end key to power on/off your mobile phone.

If you start up your mobile phone without inserting SIM card, the following two situations will appear:

“insert SIM ” –indicates no SIM card found, but you can call emergency call.

“Enter Phone Lock Code” – indicates that you have set mobile phone lock.

After inserting SIM card, the handset will automatically check if the SIM is valid.

Then, the following prompts will be displayed in order on the screen:

“Enter Phone Lock Code” – in the case you have set mobile phone lock.

“Enter PIN” – in the case you have set SIM password.

“Invalid SIM” –in the case you log on other networks, you can only dial emergency.

”Searching” –mobile phone will search until proper network access is found.

#### 3.2 Assembling of battery and SIM card

Before your can operate the mobile phone, you should get a valid SIM card from the service operator, otherwise, you could not make any call except emergency call.

1) Take out the battery

- ◆ Pull down the battery cover
- ◆ Take out the battery

2) Assemble SIM card

This mobile phone supports two SIM cards. Insert one or two SIM cards to the sockets.

3) Assemble battery

Assemble the battery as the figure; be careful that the contact metal of the battery should be consistent with the socket of the mobile phone.

Push up the battery cover as the figure.

### 3.3 Assembling of memory card

This mobile phone supports T-Flash card, which is a small multimedia memory card used to increase the memory of your mobile phone. Take care when assembling or disassembling to avoid the damage.

### 3.4 Battery Recharge

Connect the battery charger to a power outlet, plug the connector of the battery charger into the mobile phone. Then the power level indicator at upper right screen will flash. If the phone is off when charging, the screen will display "charging" indicating the battery is being charged. If the phone is deposited for long time, the power indicator may take some time to appear on the screen. If the power indicator at upper right screen of the phone displays battery full and stops to flash, it means that the charge is done. If the phone is off, the screen will display a Charge Completed indicator. During charge, it is normal if the battery, mobile phone and battery charger are hot. After the charge, disconnect the AC outlet and mobile phone with the battery charger.

This phone is just 50% charged when delivery. Please use up the power and recharge it fully. This is the case with the second recharge. After three repetitions, the battery can achieve its best performance.

## **4 Safety Password**

### **4.1 PIN number**

By setting PIN number (Personal identification number), it can prevent others from using your SIM card without authorization.

### **4.2 PIN2 number**

In order to go to “call cost” and “fixed dialing”, please contact your network service provider to confirm whether your SIM card supports such functions. After 3 times of error PIN2 number, the PIN2 number will be locked. Only after the correct PUK2 number is input can PIN2 number be unlocked. PUK2 number may be provided along with the SIM card.

### **4.3 PUK number**

In order to unlock the blocked PIN number, you need to input PUK number (Personal Unlocking Key).

### **4.4 Mobile phone password**

In order to prevent unauthorized user from using your mobile phone, you can set a password to protect your mobile phone. If you select this function, you need to input the password every time when starting up your phone. Otherwise, you cannot unlock your phone, and cannot dial or answer phone calls. Also, you can deactivate this password.

In the case of you forgetting your password, you must contact your retailer or local authorized service center to unlock the password of your mobile phone.

## **5 Quick Use Guide**

### **5.1 Call functions**

In any country using digital GSM network, so long as you are in network covering range (to know it by examining the indication bar of the network signal intensity at upper left corner of the screen), you may use the emergency call function. If your network service provider offers no roaming service in this region, the screen will display “EMERGENCY”, reminding you of making this kind of call. If you are in the

network covering range, you may make emergent call without SIM card.

### 5.1.1 Make a call

The information scales displayed on the upper left screen indicate the intensity of network signal (of which 4 scales appeared indicating the strongest signal). The calling quality will be largely affected by the barriers, so the movement within small extension can improve the intensity of signal effectively.

Ways to enter into the call screen:

**Dialing numbers in standby mode:** please input the numbers in the cursor input box, and dial the number by pressing the SIM1 or SIM2 dial key. The Mobile Phone support dual SIM cards, so you can press SIM1 or SIM 2 dial key to dial the selected number from SIM1 or SIM2 respectively.

**Dialing numbers in phonebook:** in standby mode, press right soft key to go to the phonebook menu. After find the contact, dial the number by pressing the SIM1 or SIM2 dial key.

**Dialing numbers in call list:** in standby mode, press center key to enter into main menu, and then press direction keys to select call center. Through the list of missed calls, dialed calls and received calls, select the corresponding call and dial the number by directly pressing dial key, or dial the number by entering into the options in the current list to select the number.

◆ **Domestic number:** zone code + tel. number + dial key

An extension to a fixed phone: zone code + switchboard number + "P" + extension number + dial key (Input "P" as below: press the key "p")

◆ **International fixed number:** "+" country code + telephone number + dial key (Input "+" press "+" key)

When inputting the numbers to dial, you can proceed with the following operations:

- ◆ Press the "del" key to delete the character before the cursor.
- ◆ Press the center key to save the input number.

During dialing, you can press the end key to end the call you are dialing.

### 5.1.2 Answer a call

When a call comes in, it enters into the phone-in screen, alerting you with presetting ringing tone or vibration.

If the number does not exist in the phonebook, the caller's number appears. Otherwise, his/her name appears

### 5.1.3 View the missed calls

In the main menu interface, you can select call list via direction keys. Then, select the missed call under the call history to view the missed call information.

### 5.1.4 Options available during a call

In the calling interface, you can select options to go to call options interface. These call options can be seen only during a call. Moreover, such functions as “call divert”, “many calls”, “call barring”, “call waiting” require network support, so please contact your network service provider for such functions.

With call options, you may carry out the following operations:

**Hold single call:** In “many calls”, you can hold one call.

**End single call:** End your call.

**New call:** In “many calls”, after pausing one call, you can make a new call.

**Phonebook:** Go to the phonebook menu.

**Messages:** Go to message function menu.

**Voice changer:** change the voice

**Sound Recorder:** Record the call.

**Mute/Restore:** Switch on/off the mute mode.

**DTMF:** If it is off, then it will not send the sound of DTMF for the inputted numeric figures.

Note:

Some menu items only appear in particular situations or require local network support.

### 5.1.5 Volume control

After connected to call, adjust the volume by pressing up key and down key.

## 5.2 Input text

This mobile phone supports English, Spanish, Portuguese inputs, providing you with multiple input methods: letter input, numeric input, symbol input, etc

## 6 Main Menu

### 6.1 File manager

File Manager manages the memory space of the mobile phone and the T-flash card. Access the files stored on a T-flash card. This menu is only available when you insert a T-flash card into the phone.

\*\* This phone can support up to 2GB T-flash card only.

## 6.2 Phonebook

By Saving phone numbers and the name of corresponding contact in the phone and SIM card, you can carry out related operations just via viewing the phonebook.

This mobile phone can save up to 600 telephone numbers, whereas the number of telephone numbers that can be saved in the SIM card will vary with different SIM card.

### 6.2.1 Save phone numbers and names

In standby mode, input the phone number directly. Press center key to save current number either in phone or SIM card. Then, input the name or related information. Finally, confirm the operation according to the prompts.

- ◆ When inputting wrong number, name or other related information, press del key to delete the character before the cursor.
- ◆ For inputting names and other related information, refer to chapter 5.2 “input text”.

### 6.2.2 Searching numbers in phonebook

In standby mode, press right soft key to go to phonebook, and select quick search to go to the interface view the phonebook. If you insert dual SIM cards, the numbers include phone, SIM1 card and SIM2 card.

- ◆ Select different records by upward and downward keys of direction keys
- ◆ Quick search for the records in phonebook: input corresponding content at the cursor, it will immediately display all records according to your conditions
  - Under abc input status, input “a”, it displays all records with “a” as first letter like “amy”, “andy” etc; input “n”, it displays all records starting with “an”, like “andy”;
  - Under id input status, input “a”, it displays all records with “a” as first letter like “amy”, “andy” etc; input “n”, it displays all records starting with “an”, like “andy”;
- ◆ Press aA key to switch into other input methods.

You can also select search contact in the phonebook interface. By inputting the name of contact, you will directly arrive at the corresponding record.

### 6.2.3 Phonebook options

In the phonebook interface, in addition to the above-mentioned two options: quick search and search contact, and also support the following options: View, Phonebook backup, Send SMS, Send MMS, Call, Edit, Delete, Copy, Move, Add to Blacklist, Caller groups, Phonebook settings.

### 6.3 Game

Fun Game for user to play

### 6.4 Call center

In standby mode, press the center key to go to the main menu, and then select the call center to view the phonebook and call log.

Call center include the following sub-menus: Call history and General call settings

In the **SIM1 call history**, you can carry out the following operations:

- ◆ **SIM1 Missed Calls:** record for missed calls.
- ◆ **SIM1 Dialed Calls:** record for dialed calls.
- ◆ **SIM1 Received Calls:** record for received calls.
- ◆ **Delete SIM1 Call Log:** delete the record of missed calls, or dialed calls, or received calls.
- ◆ **SIM1 Call Timers:** record of the period of last call, total calls, etc.
- ◆ **SIM1 SMS Counter:** record the number of sent messages and received messages.
- ◆ **SIM1 Call Cost:** calculate the cost of the last call, total calls, etc.
- ◆ **SIM1 GPRS Counter:** Used to record your Internet usage
- ◆ If you insert dual SIM cards, call history includes SIM2 call history. Please refer to SIM1 call history for other operations.
- ◆ In the General call settings, you can carry out the following operations:
- ◆ **SIM1 call settings:** you can set caller id, call waiting, call divert, call barring, line switching.
  - ✧ **Caller ID:** enable/disable my phone number to be displayed on the phone you are calling by selecting system presetting, hiding number or sending number.
  - ✧ **Call waiting:** you can set this function on or off, and can also view the current settings via query.
  - ✧ **Call divert:** You can set to divert the incoming calls in different cases.
  - ✧ **Call barring:** In order to activate this service, it requires the services provided by the network service provider.
    - **Outgoing calls:** You can select to bar all calls, international calls, or excluding international calls.
    - **Incoming calls:** You can select to reject all incoming calls, or incoming calls when roaming.
    - **Activate all:** All calls can be activated
    - **Cancel all:** cancel all option settings. When carrying out the operations for these options, it is required to forbid password operations.
    - **Change barring password:** You need to input the old password.
- ◆ **Line switching:** switch between line 1 and line 2.

- ✧ It is up to the network service provider if you can make calls on line 2.
- ◆ **Auto redial:** You can select to redial the number automatically when a call is not connected.
- ◆ **Blacklist:** Open the function, enter the appropriate number, will prevent the numbers and cell phone calls between the acts.
- ◆ **Call time display:** After setting this function on, you can view the call time displayed on the screen.
- ◆ **Call time reminder:** After setting this function on, it will offer warning tone towards the end of every minute sharp during the call process, so you will be reminded of the call time at any time when calling.

This feature is provided by your network service provider. Depending on the SIM card services, new menus or options may appear. Use a variety of additional services offered by your service provider.
- ◆ **WAP**  
For network connection. You want to make the right choice set, and then enter the appropriate URL to access the network.

## 6.12 Shortcuts

Provide shortcut settings to the phone applications.

## 7 FCC Warning

This mobile phone meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health.

The exposure standard for mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/Kg.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference;
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

—Consult the dealer or an experienced radio/TV technician for help.

## 8 FAQ and Solutions

Before contacting your after-sales services provider, please conduct some simple inspections as below. In this way, you may save unnecessary maintenance time and costs

FAQ	Causes and solutions
Unable to boot up	<ul style="list-style-type: none"><li>■ Ensure you have pressed and held the power on key for at least 1 second;</li><li>■ Check the battery for proper connection. Disassemble and reinstall the battery, and then try to restart the phone;</li><li>■ Check whether the battery power has been used up. Please re-charge your battery.</li></ul>
Access to network failed	<ul style="list-style-type: none"><li>■ For weak signal, move to another place and retry;</li><li>■ Out of reach of the network service provider;</li><li>■ SIM card is inactive. Contact your network service provider.</li></ul>
Display information during startup	<ul style="list-style-type: none"><li>■ Check the SIM card to see if the SIM card is correctly installed;</li><li>■ Automatic lock function is checked. Enter the phone lock password before use;</li><li>■ The PIN code is displayed. The PIN function has been checked. Enter the PIN code each time when the phone is started up; (For the first use, enter the PIN code provided with the SIM card)</li><li>■ Enter PUK code: If wrong PIN codes are entered for three times consecutively, the mobile phone will be locked. In this case, input the PUK code provided by the network service provider.</li></ul>
Poor voice quality	<ul style="list-style-type: none"><li>■ Please check whether the volume control is suitable;</li><li>■ When the phone is used in places with poor telecommunications, such as high rises or basement, the radio wave cannot be transmitted efficiently;</li><li>■ When you use the phone in the rush hour of calls, line congestion will disable calls.</li></ul>
Shorter standby time	<ul style="list-style-type: none"><li>■ The standby time is associated with the network system setup. In this case, you are possibly in place with poor communication. When the signal is not available, the phone will continue to search for the base station. This will consume a lot of battery power, making standby time much shorter. To continue to use, move to a place with strong signal, or shut down the phone temporarily;</li><li>■ Replace the battery with a new battery.</li></ul>
SIM card error	<ul style="list-style-type: none"><li>■ If the metal surface of the SIM card is dirty, clean the metal contact with a clean piece of cloth;</li><li>■ SIM card has not been properly installed;</li><li>■ If SIM card is damaged, contact your network service provider.</li></ul>

Unable to make calls	<ul style="list-style-type: none"> <li>■ Check whether the Dial key is depressed after the number is inputted;</li> <li>■ Check whether your calls have been barred due to insufficient mobile phone fee;</li> <li>■ Check whether the SIM card is effective;</li> <li>■ Check whether the call barring function has been set;</li> <li>■ Check whether the fixed dialing function has been set.</li> </ul>
Your caller is unable to access to you	<ul style="list-style-type: none"> <li>■ Check that your phone has been started up and accessed to the network;</li> <li>■ Check whether your phone has been restricted because of insufficient mobile phone fee;</li> <li>■ Check whether the SIM card is valid;</li> <li>■ Check whether the call barring function has been set;</li> <li>■ Check whether the fixed dialing function has been set.</li> </ul>
Unable to re-charge the battery	<ul style="list-style-type: none"> <li>■ Not well connected. Check whether the plug is properly connected;</li> <li>■ Charge the battery under 10 °C or above 55°C. Please change to another environment;</li> <li>■ The battery or battery charge is damaged. If necessary, change it.</li> </ul>
Unable to set up some functions	<ul style="list-style-type: none"> <li>■ Operation errors;</li> <li>■ The network service provider doesn't support this function, or you have not applied for this function.</li> </ul>
