Section 15.212 Modular Transmitters							
Request	for Modular	Approval	Requ	est for Limited Modular Approval			
		Requirements		EUT Conditions	Comply (Y/N)		
	•	Single M	odular A	Approval Requirements			
1	The radio ele	ements of the modular		The transmitter is not shielded.	Ν		
	transmitter n	nust have their own			(tested with		
	shielding. Th	he physical crystal and	1		specific host)		
		citors may be located					
	external to the	he shielded radio elem	ents.				
2	The modular	r transmitter must hav	e		Y		
	buffered mo	dulation/data inputs (i	f such				
	inputs are pr	ovided) to ensure that	the				
	module will	comply with Part 15					
	requirements	s under conditions of					
		ta rates or over-modul					
3	The modular	r transmitter must have	e its	The transmitter does not have power	Ν		
	own power s	supply regulation.		supply regulation.			
4		r transmitter must com	ply	The module antenna is permanently	Y		
		enna and transmission		attached, and no external amplifier will			
		irements of Sections 1		be used with this module.			
		nd 15.204(c). The ante					
		be permanently attache					
		nique" antenna couple					
		ons between the modu					
		including the cable).					
		il installation" provisio					
		203 is not applicable to					
		can apply to limited	$\mathbf{h}$ ( $\mathbf{h}$ )				
		provals under paragrap	n (b)				
5	of this sectio	r transmitter must be t	aatad	This module has not been tested in a	NT		
5				stand-alone condition therefore The	N		
		one configuration, <i>i.e.</i> t not be inside another		transmitter is not shielded and does not			
		g testing for complian		have power supply regulation.			
		requirements. Unless		nave power suppry regulation.			
		nodule will be battery	uie				
		must comply with the	AC				
	-	ed requirements found					
		207. AC or DC power					
		ut/output lines connec					
	-	must not contain ferrit					
		will be marketed with					
		Section 15.27(a)). Th					
		ese lines shall be the le

		he module and suppor					

	· · · · · · · · · · · · · · · · · · ·	
	equipment. Any accessories, peripherals,	
	or support equipment connected to the	
	module during testing shall be	
	unmodified and commercially available	
	(see Section 15.31(i)).	
6	The modular transmitter must be	
	equipped with either a permanently	
	affixed label or must be capable of	
	electronically displaying its FCC	
	identification number.	
		• 7
	(A) If using a permanently affixed label, the modular transmitter must be labeled with its own	Y
	FCC identification number, and, if the FCC	
	identification number is not visible when the	
	module is installed inside another device, then	
	the outside of the device into which the module is	
	installed must also display a label referring to	
	the enclosed module. This exterior label can use	
	wording such as the following: "Contains	
	Transmitter Module	
	FCC ID: XYZMODEL1" or "Contains FCC ID: XYZMODEL1." Any similar wording	
	that expresses the same meaning may be used.	
	The Grantee may either provide such a label, an	
	example of which must be included in the	
	application for equipment	
	authorization, or, must provide adequate	
	instructions along with the module which explain	
	this requirement. In the latter case, a copy of	
	these instructions must be included in the	
	application for equipment authorization. (B) If the modular transmitter uses an electronic	
	display of the FCC identification number, the	
	information must be readily accessible and	
	visible on the modular transmitter or on the	
	device in which it is installed. If the module is	
	installed inside another device, then the outside	
	of the device into which the module is installed	
	must display a label referring to the enclosed	
	module. This exterior label can use wording such	
	as the following: "Contains FCC certified transmitter module(s)."	
	Any similar wording that expresses the same	
	meaning may be used. The user manual must	
	include instructions on how to access the	
	electronic display. A copy of these instructions	
	must be included in the application for	
	equipment authorization.	
7	The modular transmitter must comply	
	with any specific rules or operating	
	requirements that	
	ordinarily apply to a complete	Y
	transmitter and the manufacturer must	
	provide adequate instructions along with	
	the module to explain any such	
	requirements. A copy of these	
	instructions must be included in the	
	application for equipment authorization.	

8	The modular transmitter must comply	Meet RF exposure compliance requirement	Y			
	with any applicable RF exposure					
	requirements in its final configuration.					
A limited modular approval may be granted for single or split modular transmitters that do not comply with						
all of the above requirements, <i>e.g.</i> , shielding, minimum signaling amplitude, buffered modulation/data inputs, or						
power supply regulation, if the manufacturer can demonstrate by alternative means in the application for						
equipment authorization that the modular transmitter meets all the applicable Part 15 requirements under the						
operating conditions in which the transmitter will be used. Limited modular approval also may be granted in						
those instances where compliance with RF exposure rules is demonstrated only for particular product						
configurations. The applicant for certification must state how control of the end product into which the module						
will be installed will be maintained such that full compliance of the end product is always ensured.
