

Test Setup Photographs for the LineaTab mini (InfineaTab mini)

1. Radiated Emissions

1.1. Configuration 1: Radiated spurious emissions <30 MHz in a semi anechoic chamber

Photo 1

Photo 2

1.2. Configuration 2: Radiated spurious emissions 30 MHz to 1 GHz in a semi anechoic chamber

Photo 1

Photo 2

1.3. Configuration 3: Radiated spurious emissions <30 MHz on an open field test site

Set up for 3 metre measurements

Photo 1

Set up for 30 metre measurements

Photo 2

Radiated Emissions (continued)

1.4. Configuration 4: Radiated spurious emissions <30 MHz on an open field test site

Set up for 300 metre measurements

Photo 1

Set up for 300 metre measurements (EUT end facing towards the mag loop antenna)

Photo 2

2. **AC Conducted Emissions**
