RE: Ruetech Radar Systems Class II Permissive Change.

To whom it may concern,

Ruetech would like to submit a Class II Permissive change to have the MPE evaluation information removed from the FCC Equipment Authorization site. The unit, FCC ID: YSD-5840-SL-3000 was granted 09/29/2009. Ruetech has supplied a new evaluation calculation that shows there are no RF hazards from their device. The information was sent to the FCC through labhelp and that correspondence is included in the CPII.

Thank you for your attention to this matter,

Steven D. Koster  
Vice President  
Washington Laboratories
