K1V 1H2

FCC ID: YST-NX15, Model Numbers: EX20 CO

IC: 9299A-NX15, Model Numbers: EX20C CO

Model Differences

- | | |
|-------------|--------------------------------------------------|
| 1. EX20 CO | Carbon Monoxide/Heat Alarm, Battery only, USA |
| 2. EX20C-CO | Carbon Monoxide/Heat Alarm, Battery only, Canada |

All models use the same oscillator, microcontroller, radio, antenna, and basic layout. Each of the Canadian models have identical hardware and software to the USA models, but have different labels. Exigent is presenting the data using the EX-20AC SMK sample for certification of the NX-15 and data as found in Test Report 2013 08241153 X as it uses the same circuitry as the NX-14, omitting the AC circuits are evident in the EX20 CO, EX20C CO.

Sincerely,

Chad Christensen
Electrical Engineer
Exigent Sensors
