## Statement

We, Fujitsu Toshiba Mobile Communications Ltd, state that our device with the FCC ID: YUW-FJI11, do not support RFID function when charging battery.

Besides, WiMAX, FM, and HDMI function are only for Japanese market. We will use software to disable these functions when roaming overseas.

This software allows the device to recognize where the signal is originated from (Japanese base station? Or other overseas base station). When the device detects the signal is not from Japanese base station, the function of WiMAX, FM and HDMI will be disabled automatically.

Sincerely yours,

Takanori Tanaka
