**Statement of Wireless LAN Function Disable**

To: Federal Communications Commission  
7435 Oakland Mills Road  
Colombia MD 21046

Product: Tablet PC  
Model No. : FJT21  
FCC ID: YUW-FJT21

**Channels 12 and 13**

The above device (Tablet PC) has capability of Channels 12 and 13. These functions cannot be activated by the user in case the Tablet PC is used or switched on in the United States. These channels disable upon PCS 1900 and W-CDMA Band V Mobile Country Code (MCC) checking. Channels 12 and 13 are not activated when Tablet PC switched on in the United States or Tablet PC switched on outside service area in both cases these functions are also not activated automatically.

When the Tablet PC is inside the service area of a network, it will search all available networks. These functions are never activated in the United States where there is no commercial network for those services. While searching for the network the Tablet PC does not transmit any signal.

Also, the user access to all functions related to Channels 12 and 13 will be disabled where it cannot detect networks having those services, or where the Tablet PC can detect network having PCS 1900 and W-CDMA Band V and these prevent the user from manually switching on these functions.
