

## Circuit Description

The EUT was supplied by the action comcorder, and to the U1 RTC6701, which osc is 12MHz, and the singal deal process, the processed singal will be send to the A/D unit, will deal the final singal to send out. the working frequency points were the 2414MHz/2432MHz/2450MHz/2468MHz, and it can be choose by the channel switch.
