

Instruction for 12 buttons remote

Usage

1. Put the 23A 12V battery into the battery box on the back of the remote, and then turn on the remote switch.(Down for On and UP for Off)
2. The remote should work with the fireworks firing system receiver. You could run the receivers by the remote button when keep in distance.

technical parameters

- 1.working voltage: DC12V/23A
- 2.working frequency: 433MHz
- 3.working current: 34mA
- 4.encoded mode : Leaning code (eV1527)
- 5.transmission range : >50m(the Sensitivity of the dashreceiver is higher 6.than -103dBm when it is in the open ground)
- 6.output power: 16dBm (40mW)
- 7.transmission rate : : <10Kbps
- 8.modulation system: OOK (AM)
- 9.operating temperature: -10°C~+70°C
- 10.Dimension: 85*36.5*16mm

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To assure continued compliance, any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment. (Example- use only shielded interface cables when connecting to computer or peripheral devices).

This equipment complies with Part 15 of FCC RF Rules. Operation is subject to the following two conditions:

- 1) This device may not cause interference and
- 2) This device must accept any interference, including interference that may cause undesired operation of the device.

Caution!

The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user authority to operate the equipment.
