

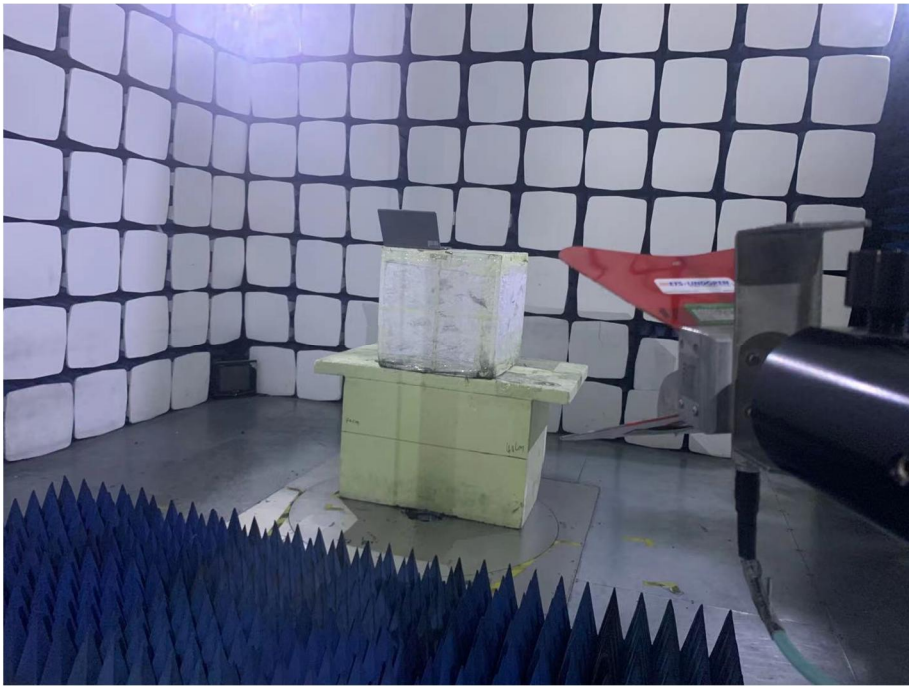

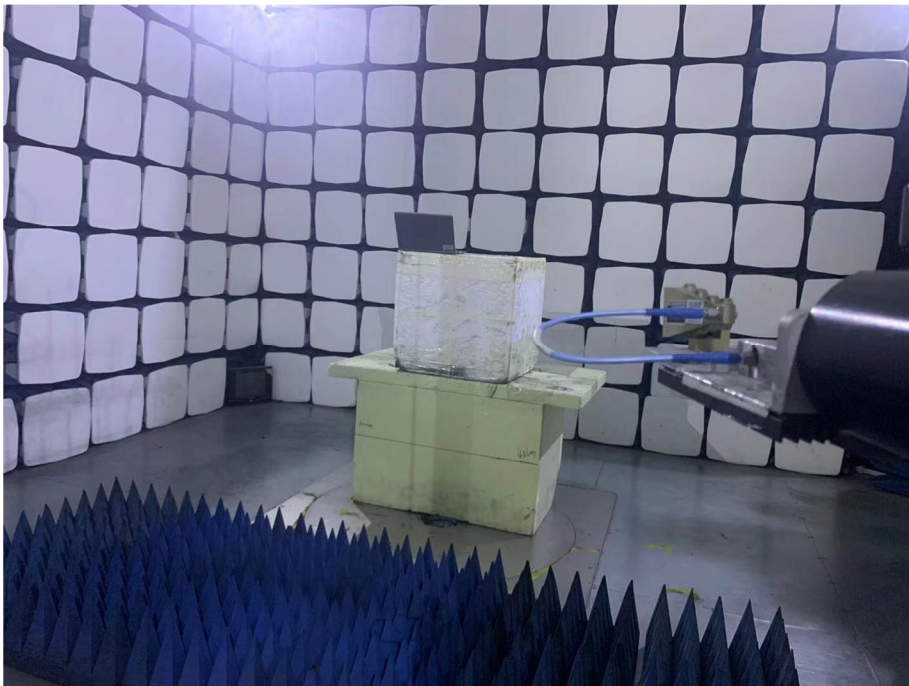

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Radiation Emission Test Setup (Below 30MHz)

Radiation Emission Test Setup (30MHz to 1GHz)

<p>Radiation Emission Test Setup (1GHz to 18GHz)</p>	 A photograph showing a radiation emission test setup. A device, possibly a laptop or a small server, is placed on a yellow wooden pallet stand in the center of an anechoic chamber. The walls are covered with white, square-shaped electromagnetic absorbers. The floor is covered with blue, pyramidal-shaped electromagnetic absorbers. To the right, a large black cylindrical antenna is visible, mounted on a stand. A red antenna is also visible in the background.
<p>Radiation Emission Test Setup (Above 18GHz)</p>	 A photograph showing a radiation emission test setup for frequencies above 18GHz. The setup is similar to the one in the first image, with the device on the yellow stand in the anechoic chamber. However, a blue cable is now connected to the antenna on the right, indicating a different configuration for higher frequency testing.
