

Z-Wave Module Assembly – ZM5202 chip assembly situated in the middle of the PCB, antenna running from top of PCB down right hand side. Host connection at the bottom.

View shows Z-Wave ZM5202 assembly in the center, to the right is the antenna and the impedance matching filter. To the immediate left is the supply EMI filter. At the top right hand is the Z-Wave configuration EEPROM. In the left hand corner is the asynchronous serial to synchronous serial communications translator

Rear of PCB showing Ground Plane
